Professional Elective-II: Computational Techniques & Numerical Methods, Simulation Techniques

• **Note :**

1. Batch size for the practical /tutorial shall be of 20 students. On forming the batches, if the strength of remaining student exceeds 09, then a new batch shall be formed.
2. Industrial Training (evaluated at B.E. Sem.-I) of minimum 30 days shall be completed in any vacation after S.E. Sem.-II, may be Maximum in two slots but before B.E. Sem.-I & the report shall be submitted and evaluated in B.E. Sem.-I
3. Appropriate subjects under Elective I & II may be added as per the requirement.
4. Term work assessment shall be a continuous process based on student's performance in – class tests, assignments, homework, subject seminars, quizzes, laboratory books and their interaction and attendance for theory and laboratory sessions as applicable

Solapur University, Solapur

S.E. (Mechanical Engineering) Semester-I

ME212 APPLIED THERMODYNAMICS

Teaching Scheme

Theory – 3 Hrs. /Week

Laboratory– 2 Hrs. /Week

Examination Scheme

ESE -70 Marks

ISE – 30 Marks

ICA - 25 Marks

Oral Exam – 25 Marks

• **Course Introduction:** Applied Thermodynamics is one of the core course in the Mechanical Engineering curriculum, as well as one of the traditional course, dating back from the last many centuries. In Applied Thermodynamics the significance moves from studying general concepts with illustrative examples to develop methods and performing analyses of real life problems. The objective of this subject is to apply knowledge of basic thermodynamic concepts such as temperature, pressure, work & heat, internal energy, enthalpy and entropy to systems. The teaching of this course has followed the well-established topics required for industrial applications, which in brief, where some general properties & graphical representation of various thermodynamics systems.

• **Course Prerequisite:** Engineering Physics, Engineering Chemistry, Basic Mechanical Engineering.

• **Course Objectives:**

1. To study fundamental laws of Thermodynamics and its real life applications.
2. To study and analyze power producing devices used in practice such as boilers and turbines.
3. To study Power consuming devices used in practice such as compressor and their analysis.

• **Course Outcomes:** By completion of the course the students will be able to:-

1. Apply knowledge of mathematics and science to solve real thermodynamics problems.
 2. Calculate the efficiency of mechanical devices like boiler, compressor, steam turbine, etc.
 3. Apply knowledge of basic thermodynamic concepts such as temperature, pressure, work & heat, internal energy, enthalpy and entropy to systems.
 4. Design and analyze power producing devices used in practice such as boilers and turbines.
-

SECTION I

Unit 1: Basic Laws of Thermodynamics

No. of lectures-08

• **Prerequisite:** Fundamentals of basic concepts of Physics and Chemistry behind thermodynamics.

• **Objectives:**

1. To define laws of thermodynamics & describe their applications.
2. To determine standard enthalpy change for formation & combustion reactions.
3. To study thermal systems like heat engine, heat pump & refrigerator.
4. To calculate entropy change for different thermodynamic processes.

- **Outcomes:** After completing this unit, students will be able to-
 1. Explain different laws of thermodynamics.
 2. Determine standard enthalpy change for formation & combustion reactions.
 3. Describe thermal systems like heat engine, heat pump & refrigerator.
 4. Calculate entropy change for different thermodynamic processes.
- **Unit content:** Review of basic concepts, Application of First law of Thermodynamics to chemically reacting system: Fuels & combustion, the standard enthalpy (heat) of reaction, the standard enthalpy of formation, standard enthalpy of combustion.
 Second Law of Thermodynamics: Limitation of first law of thermodynamics, heat engine, refrigerator and heat pump, Kelvin- Plank and Clausius statements and their equivalence. Reversibility and Irreversibility, Carnot cycle. Principle of entropy increase
 Calculation of entropy change for:
 - i) Absorption of energy by a constant temperature bath
 - ii) Heating OR cooling of matter.
 - iii) Phase change
 - iv) Adiabatic mixing
 - v) Change of state of an ideal gas.
- **Content Delivering Methods:** Board, Chalk & talk and Power Point Presentation.
- **Assessment Methods:** Questions based on applications of laws of thermodynamics, explanations of standard enthalpy (heat) of reaction, standard enthalpy of formation, standard enthalpy of combustion, analysis of heat engine, heat pump & refrigerator, calculation of entropy change for different thermodynamic processes.

Unit 2:– Properties of pure substance & Steam

No. of lectures-02

- **Prerequisite:** Fundamentals of laws of thermodynamics, basics of thermodynamic properties and basic chemistry.
- **Objectives:**
 1. To understand phase change process of pure substances.
 2. To describe properties of different types of steam.
 3. To study steam tables & Mollier diagram.
- **Outcomes:** After completing this unit, students will be able to-
 1. Understand phase change process of pure substances.
 2. Describe properties of steam.
 3. Apply Steam tables & Mollier diagram for thermodynamic problems.
- **Unit content:** Properties of pure substance-Property diagram for phase - change processes
 Steam Properties (wet, saturated, superheated, degree of superheat and dryness fraction);
 Temperature-entropy and temperature-enthalpy diagrams, Mollier diagram
- **Content Delivering Methods:** Board, Chalk & talk and Charts.
- **Assessment Methods:** Questions based on definition, explanation & thermodynamics plots

Unit 3: Performance of Boilers

No. of lectures-05

- **Prerequisite:** Fundamentals of laws of thermodynamics & basics of steam power plant.
- **Objectives:**
 1. To explain boiler, its classification and constructional details.
 2. To study performance parameters of boilers.
 3. To calculate efficiency of boiler & draw heat balance sheet.
- **Outcomes:** After completing this unit, students will be able to-
 1. Explain boiler & its classification.
 2. Describe performance parameters of boiler.
 3. To calculate efficiency of boiler & draw heat balance sheet for boiler.

- **Unit content:** Classification, salient features of high pressure boilers, Evaporation, equivalent evaporation, Boiler efficiency, heat losses in boiler plant & heat balance sheet (Numerical treatment).
- **Content Delivering Methods:** Board, Chalk & talk, Animated videos and Models.
- **Assessment Methods:** Questions based on definition, explanation, Problems on performance parameters of boiler, efficiency, heat losses in boiler plant & heat balance sheet.

Unit 4: Vapour Power Cycles

No. of lectures-04

- **Prerequisite:** Properties of pure substance and steam & basics of steam power plant.
- **Objectives:**
 1. To describe classification of thermodynamics cycles.
 2. To understand Carnot and Rankine Vapour Power Cycle.
 3. To analyze Rankine Cycle.
 4. To study effect of operating condition on Rankine Cycle.
- **Outcomes:** After completing this unit, students will be able to -
 1. Describe classification of thermodynamics cycles.
 2. Differentiate Carnot and Rankine cycle.
 3. To solve numerical on Rankine cycle.
 4. Discuss effect of operating condition on Rankine cycle.
- **Unit content:** Classification of cycles, vapour power cycles, Carnot vapour power cycle, simple Rankine cycle, actual Rankine cycle, Effect of operating conditions on Rankine cycle efficiency, Ideal reheat cycle, open feed water heater (direct contact heating) regenerative cycle.
- **Content Delivering Methods:** Board, Chalk and talk.
- **Assessment Methods:** Questions based on explanation, derivations, problems on Carnot and Rankine vapour power cycles.

SECTION II

Unit 5: Steam Nozzles

No. of lectures-05

- **Prerequisite:** Knowledge of basic properties of steam & compressibility of fluid.
- **Objectives:**
 1. To describe types of nozzles.
 2. To apply thermodynamic properties for flow through nozzle.
 3. To use Mollier diagram for problems on nozzles.
- **Outcomes:** After completing this unit, students will be able to-
 1. Describe types of nozzles.
 2. Derive discharge through nozzles.
 3. Solve problems by using Steam tables & Mollier diagram.
- **Unit content:** Types of Nozzles flow of steam through nozzles, condition for maximum discharge, expansion of steam considering friction, Super saturated flow through nozzles, Mach. No., Types of flows.
- **Content Delivering Methods:** Board, Chalk & talk and Power Point Presentation.
- **Assessment Methods:** Questions based on definition, explanation, derivation. Problems on discharge through nozzles using Mollier diagram.

Unit 6: Steam Condensers

No. of lectures-05

- **Prerequisite:** Knowledge about laws of thermodynamics & Steam power plant.
- **Objectives:**
 1. To describe elements of steam condensing plants.
 2. To study classification & construction of condensers and cooling towers.
 3. To study thermodynamic analysis of condenser.
- **Outcomes:** After completing this unit, students will be able to-
 1. Describe elements of steam condensing plants.
 2. Differentiate between surface and jet condensers
 3. Explain thermodynamic analysis of condenser.
- **Unit content:** Elements of steam condensing plants, advantages of using condensers, types of condensers, Thermodynamic analysis of condensers, efficiencies, cooling towers.
- **Content Delivering Methods:** Board, Chalk & talk, Animated videos and Power Point Presentation.
- **Assessment Methods:** Questions based on definition, classification and explanation.

Unit 7: Steam Turbines

No. of lectures-05

- **Prerequisite:** Knowledge about laws of thermodynamics, Steam power plant & Steam nozzles.
- **Objectives:**
 1. To summarize classification and applications of steam turbines.
 2. To study principle & construction of steam turbines.
 3. To study losses in steam turbines.
 4. To calculate efficiency of steam turbine.
- **Outcomes:** After completing this unit, students will be able to-
 1. Differentiate between Impulse and reaction turbines and various applications of steam turbine.
 2. Describe construction of steam turbine.
 3. Explain losses in steam turbines.
 4. Calculate efficiency of steam turbine.
- **Unit content:** Steam Turbines:- Advantages and classification of steam turbines, simple impulse turbine, compounding of steam turbines, Parson's reaction turbine, Velocity diagrams, work done and efficiencies, losses in turbines.
- **Content Delivering Methods:** Board, Chalk & talk, Animated videos and Power Point Presentation.
- **Assessment Methods:** Questions based on classification, explanation, derivation, problems on work done and efficiencies of impulse turbine.

Unit 8: Reciprocating Air Compressors

No. of lectures-06

- **Prerequisite:** Laws of thermodynamics & thermodynamic processes.
- **Objectives:**
 1. To describe classification and applications of air compressors.
 2. To understand construction & working of single stage & multistage air compressor.
 3. To calculate work input required for different compression processes.
 4. To determine efficiencies of a reciprocating air compressor.

- **Outcomes:** After completing this unit, students will be able to -
 1. Describe classification and applications of air compressors.
 2. Explain constructional details of single stage and multistage reciprocating compressor.
 3. Compute work input required for different compression processes.
 4. Calculate efficiencies of a reciprocating air compressor.
- **Unit content:** Uses of compressed air, classification of compressor, constructional detail of single & multistage compressor, types of compressor valves, computation of work, isothermal work done, isothermal efficiency, effect of clearance, volumetric efficiency FAD, theoretical & actual indicator diagram, method of improving volumetric efficiency, Need of multistage, work done, volumetric efficiency, condition for maximum efficiency, inter cooling.
- **Content Delivering Methods:** Board, Chalk & talk, animated videos, Power Point Presentation.
- **Assessment Methods:** Questions based on classification, explanation, derivation, problems on computation of work, various efficiencies, FAD, maximum efficiency.

- **In Semester Evaluation (ISE):**

ISE shall be based upon student's performance in minimum two tests conducted and evaluated at institute level.

- **In Semester Continuous Assessment (ICA):**

ICA shall be based on below experiments and assignments

Group – I

Any Three Assignments on following topics

1. Study of process boilers (Cochran, Babcock & Wilcox, Lancashire)
2. Boiler mountings & accessories
3. Study of various types of steam calorimeter
4. Lubrication – Necessity, types of lubricants, properties of Lubricants (oil & Greases), Selection of lubricants

Group – II

Any Six Experiments of following:

- | | |
|---|--------------------------------|
| 1. Cloud & Pour point of a lubricant | 2. Flash & Fire point |
| 3. Test on carbon residue | 4. Trial on Redwood viscometer |
| 5. Trial / Study of Bomb calorimeter | 6. Test on grease penetrometer |
| 7. Trial on reciprocating air compressor. | 8. Trial on steam calorimeter |
| 9. Industrial visit to any process / power industry | |

- **Text Books:**

1. An introduction to Thermodynamics – Y.V.C. Rao – Universities Press.
2. A Course in Thermal Engineering – Domkundwar Kothandraman Dhanpat Rai & Co. Delhi.
3. Thermal Engineering R. K. Rajput – Laxmi Publication – New Delhi (Sixth Edition)
4. Basic & Applied Thermodynamics by P.K. Nag Tata McGraw Hill Publication

- **Reference Books:**

1. Thermodynamics by C.P. Arora TMH New Delhi 1998 edition.
2. Thermodynamics & Heat Engine – Vol 1 & Vol 2 – R. Yadav Central Book Depot.
3. Thermodynamics- Cengel Boles, Tata McGraw Hill New Delhi.
4. Steam & Gas Turbines- R. Yadav, CPH Allahabad.

Solapur University, Solapur

S.E. (Mechanical Engineering) Semester-I

ME214 MANUFACTURING PROCESSES

Teaching Scheme

Theory: 3 Hrs/week/Class

Practical: 2 Hrs/week /batch

Examination Scheme

ESE: 70 Marks (3 Hrs.)

ISE – 30 Marks

ICA: 25 Marks

• **Course Introduction:**

This course covers all primary manufacturing processes like casting, forging, rolling, extrusion and Drawing along with Fabrication. These processes are basics of Mechanical Engineering programme. The basics of this processes along with their applications and equipment and machinery required for the processes is covered in brief. This course also introduces Manufacturing Techniques for plastic products. Recent trends in various processes are also discussed in brief.

-
- **Course Prerequisite:** Fundamentals of Mechanics, force, power and mechanical properties of materials, thermal properties of materials is required to be known to the candidate undergoing to the course.

• **Course Objective:**

1. To introduce to the students the casting technique and its significance in manufacturing.
2. To introduce to the students with various plastic deformation processes and their application.
3. To introduce to the students the various fabrication techniques and their significance in Industry.
4. To introduce to the students with various plastic manufacturing processes.
5. To introduce to the students with recent trends in this processes.

-
- **Course Outcomes:** At the end of this course, the students will be able to

1. Select appropriate manufacturing process for a given component.
 2. Understand performance of each process.
 3. Prepare manufacturing plan for the given component.
-

SECTION I

UNIT-1 Casting Processes No. of lectures-06

- **Prerequisite:**

Various mechanical, thermal properties of material

- **Objectives:**

1. To introduce to the students with basic foundry process.
2. To introduce to the students with various steps like casting processes.
3. To introduce to the students with advantages, limitations and uniqueness of the foundry process.
4. To introduce to the students with techniques of filling the mold cavity and feeding the casting

- **Outcomes:** After completing the unit

1. Students will be able to understand basic concepts in foundry process.
2. Students will be able to understand importance of allowances to be provided on pattern materials and factors in selection of pattern.
3. Students will be conversant with gating system and its parts with their functions will be able to understand functions and significance of Riser.

- **Unit Content:** Basic steps in casting processes, Importance and uniqueness of casting as a manufacturing process, Advantages and limitations of casting process, General introduction to patterns, Core boxes and Gating systems. Types of patterns, Cores, Core boxes, materials used, Allowances, selection criteria, Components of gating system, functions of each part, Function of riser, types of risers, method to improve efficiency of risers.
- **Content Delivering Methods:** Board, Chalk and Talk.

UNIT-2 Moulding and core making processes

No. of lectures-07

- **Prerequisite:** Students should have understood basic steps in foundry process, what is mold, what is core.
- **Objectives:**
 1. To make students to understand basics of green sand, its ingredients, additives and its requisite properties.
 2. To introduce to the students oil sand core making, and other core making techniques and their comparison.
 3. To make the students aware of green sand molding techniques with its scope and limitations along with other molding techniques and their comparison.
 4. To introduce to the students with their advantages, limitations and applications.
- **Outcome :** After completing the unit
 1. Student will be able to understand the variation in properties of green sand with variation in ingredients and additives.
 2. Students will be able to understand significance and simplicity of green sand molding technique.
 3. Students will be able to select proper casting technique forecasting a particular component.
- **Unit Content:** Green Moulding sand, its ingredients and properties, facing sand, backing sand, shell sand, CO₂ sand, Oil sand cores, and core making, CO₂ core making, shell core making, cold box process of core making, Green sand moulding (hand and machine moulding), shell moulding, CO₂ process, Introduction to special casting techniques, such as Investment casting, centrifugal casting, Continuous casting, gravity and pressure die casting processes.
- **Content Delivering Methods:** Board, Chalk and Talk.

UNIT-3 Melting and pouring

No. of lectures-04

- **Prerequisite:** Understanding of melting process and basics of electric Engg.
- **Objectives:**
 1. To introduce the students with construction and working of various melting furnaces used in CI foundry with their charge materials and their thermal efficiency.
 2. To introduce to the students with working of Arc furnace and its application.
 3. To make the students aware regarding various metal pouring techniques.
- **Outcomes:** After completing the unit,
 1. Students will be able to understand and compare melting of CI induction Furnace and cupola and will be able to judge the advantages and limitations of various units and will be able to apply proper melting unit for manufacturing particular component/components.
 2. Students will be able to understand importance of Arc furnace is a melting unit in heavy steel foundries.
 3. Students will be able to select to select prospering method for a particular cast metal/ alloys.

- **Unit Content:** Melting furnaces used in C.I. Foundries, i.e. Cupola, Induction furnace construction and working in brief, Arc furnaces used in steel foundries, Crucible, oil and gas fired furnaces, Pouring equipments
- **Content Delivering Methods:** Board, Chalk and Talk.

UNIT-4 Fettling, Cleaning and Inspection of Castings

No. of lectures-03

- **Perquisite:** Understanding of Unit I, II, III
- **Objectives:**
 1. To introduce to the students with need for fettling operation and equipment.
 2. To introduce to the students with various casting defects with their causes and remedies.
 3. To introduce to the students with concept of mechanization and computer application.
- **Outcome:** At the end of unit students will be able to
 1. Understand need for fettling and cleaning will be able to understand how to fettling work by taking proper core in molding process.
 2. Understand the basic defects and will be able to how these defects can be minimize by adapting proper process control at each stage of process.
 3. Understand effects of mechanization and application of computers.
- **Unit Content:** Need for fettling, stages in fettling, equipments used infettling and cleaning of castings, Common important defects in castings. Inspection procedure, Computer applications in foundry processes, foundry, Mechanization.
- **Content Delivering Methods:** Board, Chalk and Talk.

SECTION II

UNIT-5 Forming Processes: Rolling & forging

No. of lectures-06

- **Perquisite:** Knowledge of Ductility, Malleability and Plastic deformation.
- **Objective:**
 1. To introduce to the students with various plastic deformation processes like forging, rolling.
 2. To introduce to the students with their advantages and limitations of various Plastic deformation process.
 3. To introduce to the students the various forging techniques and their application.
 4. To introduce to the students the various rolling techniques and their application.
- **Outcome:** On completion unit students will be able to
 1. Understand application and scope of various plastic deformation processes.
 2. Select proper plastic deformation process for a manufacture of particular component.
- **Unit Content:** Introduction to forming process, Classification of forming processes, Introduction to Rolling mills, Classification, hot rolling, rolling of billets, rods, sections, sheet, Tube rolling, cold rolling of sheets, Advantages of forging processes over other processes, Basic forging equipments, Open die forging, closed die forging, drop forging, cold heading etc.
- **Content Delivering Methods:** Board, Chalk and Talk.

UNIT-6 Extrusion, Wire, rod and tube drawing

No. of lectures-03

- **Prerequisite:** Plastic deformation technique
- **Objectives:**
 1. To introduce to the students with extrusion of bar and tube and its significance in industry.
 2. To introduce to the students with various technique of bar, wire and tube drawing and its significance in industry.
- **Outcome:** At the end of unit, students will be able to
 1. Understand significance of extrusion and drawing process and shall be able to select proper process for manufacturing of tube/bar, wire.
- **Unit Content:** Types – direct extrusion, indirect extrusion, impact extrusion, hydrostatic extrusion, Wire drawing process, single pass and multi pass wire, drawing, wire drawing bench, Methods of rod and tube drawing
- **Content Delivering Methods:** Board, Chalk and Talk.

UNIT-7 Introduction to Joining processes

No. of lectures-08

- **Prerequisite:** Introduction to joining methods
- **Objectives:**
 1. To introduce to the students with various joining methods.
 2. To introduce to the students with various equipments of gas welding, methods and its application.
 3. To introduce to the students with principle of are welding, methods of are welding, their scope and limitation.
 4. To introduce to the students with brazing and soldering techniques and their significance
- **Outcome:** At the end of unit student will be able to
 1. Select proper gas mix, for proper pressure, proper torch during gas welding, cutting.
 2. Select proper current and voltage, proper equipment dur are welding.
 3. Select proper welding process with proper weld joints for joining of components.
 4. Understand and compare between welding, soldering and brazing.
- **Unit Content:** Welding processes, such as gas welding, arc welding, submerged arc welding, TIG welding & MIG welding, resistance welding, Gas cutting, Plasma arc cutting etc, Brazing and soldering.
- **Content Delivering Methods:** Board, Chalk and Talk.

UNIT-8 Processes for Plastics

No. of lectures-03

- **Prerequisite:** Introduction to Polymer
- **Objectives:** To introduce to the students with various processes for manufacturing of components with plastics (both thermoplastic and thermosetting plastics) brief introduction to the process is desired.
- **Outcome:** At the end of unit student will be able to understand
 1. Significance and scope of various plastic manufacturing processes.
 2. Will be able to select proper process for thermoplastic and thermosets.
 3. Importance of application of plastics in various fields
- **Unit Content:** Injection moulding, Extrusion, Blow moulding, Compression moulding.
- **Content Delivering Methods:** Board, Chalk and Talk.
- **Note:** - For all processes introductory treatment only, in depth coverage not expected.

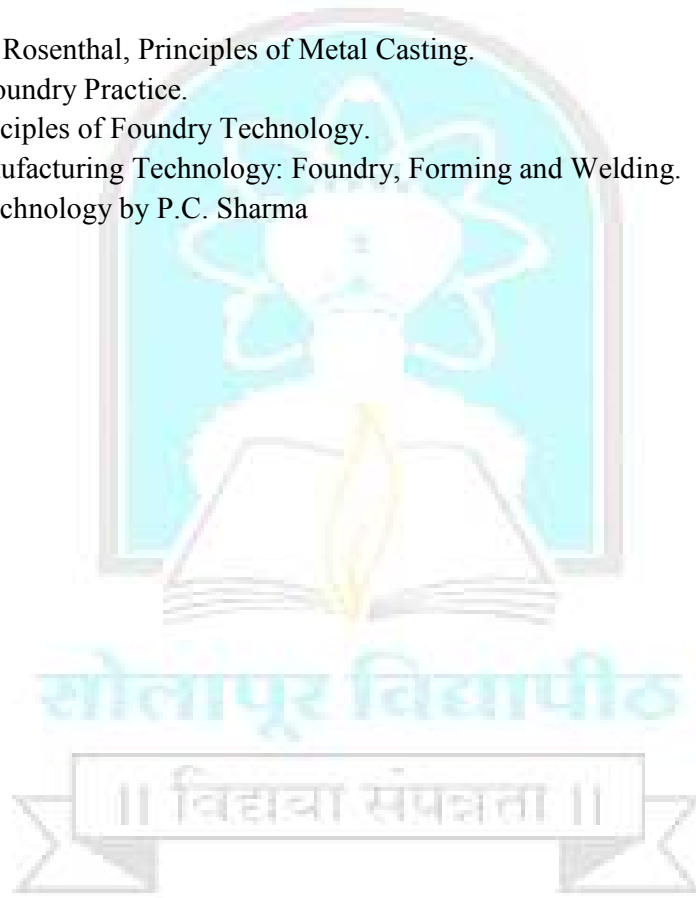

- **Internal Continuous Assessment (ICA):**

1. Exercise on pattern and core box design, & drawing, for a simple component (Drawing on sheet expected).
2. Testing of silica sand for grain fineness and clay content.
3. Testing of green sand for green compression strength, permeability, moisture content.
4. Study of mould and core hardness tester.
5. Study of manufacturing sequence of any one forged product.
6. Study of manufacturing sequence of any one rolled product.
7. Visit to Foundry unit.
8. Visit to forging shop

(Journal based on above term work)

- **Text Books:**

1. Heine, Lopar, Rosenthal, Principles of Metal Casting.
2. N.D. Titov, Foundry Practice.
3. P.L. Jain, Principles of Foundry Technology.
4. P.N.Rao, Manufacturing Technology: Foundry, Forming and Welding.
5. Production Technology by P.C. Sharma

Solapur University, Solapur

S. E. (Mechanical Engg.) Semester-I

ME217 WORKSHOP PRACTICE – II

Teaching Scheme:
Practical: 2 Hours / week

Examination Scheme:
ICA: 50 marks

-
- **Course Prerequisite:-** fundamental machine shop instruction involving safety use and care of hand and measuring tools basic operation of all conventional machines and grinding of single point tools, screw threads and taper turning and their application classes of fits and tolerances are stressed students will be provided the opportunity to learn and practice bench work skills.
-

- **Course Objectives:**

1. To get hands on experience of machining techniques such as grinding, drilling, shaping, turning etc. studied in theory subjects.
 2. To develop skills to operate different machine tools.
 3. To get hands on experience in pattern making, joining processes and forming processes.
 4. To develop skills in pattern making and sheet metal work.
-

- **Course Outcomes:** At the end of this course, the student will be able

1. To operate different machine tools such as grinders, lathes, drilling machines etc.
2. To machine the component as per specified dimensions.
3. To develop the skills necessary for engineering practices like joining and forming processes.
4. To Choose and apply the appropriate methods for pattern making & sheet metal working

1. Preparation of Wooden pattern (single piece) for a simple component: Part A – This shall cover – Study of component drawing, preparing casting drawing, Allowance table, Pattern drawing, Deciding parting line & Deciding pattern making process. Part B – Actual manufacturing of pattern

(2 Turns)

2. Study of gas welding & gas cutting equipments, Study of arc welding equipment, Study & demonstration of resistance welding, Study of various types of welding joints & demonstration of gas & arc welding, Manufacturing of one job on arc welding (2 turns)

3. Demonstration Study of sheet metal operations like bending, shearing, lancing, perforating, punching etc...

4. One sheet metal job consisting of at least 3 operations. (2 Turns)

(Either performed manually or on press) Demonstration:

OR

4. Study of various hand forging operations like upsetting, drawing down, piercing, swaging Etc...One job involving 3 operations. (Either performed manually or on press) (2 Turns)

Note: Students shall prepare a work book involving brief write up regarding machine/machines employed for job. Students should prepare a work book which involves a process sheet for each job and inspection report of the job. Based on the job performed, attendance record, work book, internal viva, faculty members may evaluate the term work.

• **Books:**

1. Workshop Technology (Volume II) by Raghuvanshi.
2. Workshop Technology (Volume II) by Hajra Chowdhary.
3. Workshop Technology (Volume II) by W.A.J.Chapman.
4. Production Technology by P.C. Sharma.
5. Production Technology – HMT Handbook. 6. Production Technology (Volume II) by Gupte-Patel.
6. P.L. Jain, Principles of Foundry Technology.
7. P.N. Rao, Manufacturing Technology: Foundry, Forming and Welding.
8. Workshop Technology (Volume II) by W.A.J. Chapman. 6. Production Technology – HMT Handbook.

• **Reference Books:**

1. Manufacturing Processes & systems by Phillip F. Ostwald, Jairo Munoz-Wiley India.
2. Fundamentals of modern Manufacturing by Mikel P. Groover-Wiley India

ME222 MACHINE TOOLS & PROCESSES

Teaching Scheme

Theory – 3 Hrs. /Week

Laboratory– 2 Hrs. /Week

Examination Scheme

Theory –70 Marks

ISE – 30 Marks

ICA – 25 Marks

-
- **Course Introduction:** machining is accomplished with the use of machines known as machine tools. For production of variety of machined surfaces, different types of machine tools have been developed. The kind of surface produced depends upon the shape of cutting, the path of the tool as it passes through the material or both depending on metal cutting processes are called either turning or planing or boring or other operations performed by machine tools like lathe shaper, planer drilling milling grinding gear cutting, CNC or VMC and other Non-conventional machine.

-
- **Course Prerequisite:** In general manufacturing process is economic term for making goods and services available to satisfy human wants. It involves a series of related activities and operation is called production System. It is depicted as an input –output system, here the inputs elements undergo technological transformation (machine tools) to yield a set of output elements called as product.

- **Course Objectives:**

1. To study the conventional machining processes such as drilling, milling, shaping, planing carried out on typical machine tools for different applications.
2. To study unconventional machining processes such as EDM, ECM, AWJM and USM carried out on special purpose machine tools for typical applications.
3. To compare and select a suitable manufacturing process.

-
- **Course Outcomes:** At the end of this course, the student will:

1. Exhibit knowledge of conventional, unconventional & modern machining processes and machine tools.
2. be able to select proper manufacturing process for the typical application

- **Course Curriculum**

SECTION I

Unit No 01: Lathe Machine

No. of lectures-08

- **Prerequisite:** The lathe is a machine tool on which metal machining is done by combining the rotation of the job with a perpendicular feed of the tool it is primarily designed to produce cylindrical surfaces with a designed to produce cylindrical surfaces with a single point tool.
- **Objectives:**
 1. To study about construction and working principle of lathe machine.
 2. To study about various accessories and attachment of lathe machine.
 3. To study about various operations to be performed on lathe machine.
- **Outcomes:**
 1. To know and exhibit various parts of lathe machine.
 2. Students should be able to select proper speed, feed, and depth of cut as per operation.
 3. Student should know about how to process a simple component on lathe machine.

- **Unit content:** Introduction to Centre Lathe, parts and functions, specifications, accessories and attachments. Lathe operations, Taper turning methods, simple Numerical on Thread cutting, processing of simple component on lathe
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 2: Drilling Machine

No. of lectures-03

- **Prerequisite:** It is process of making hole or enlarging a hole in an object by forcing a rotation tool called as drill.
- **Objectives:**
 1. To study about construction and working of grilling machine.
 2. To study about tool and job holding devices on drilling machine.
- **Course Outcomes:**
 1. Be able to select speed, feed while drilling.
 2. Student should know about various operations to be performed on drilling machine.
- **Unit content:** Classification, construction and working of Pillar type and radial drilling machines, Job & Tool holding devices and accessories, various operations.
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 3: Shaper, Plainer and slotting Machine

No. of lectures-04

- **Prerequisite:** There are reciprocating types of machine tools inclined flat surface horizontal, vertical in clined flat surfaces as well as keyway.
- **Objectives:**
 1. To study about various parts of shaper planner and slotting machine
 2. To study about construction and working principle about all above machine.
- **Outcomes:**
 1. To know and exhibit knowledge about various job performed an above machine.
 2. Able to know about specification types and selection of above on machine for particular job.
- **Unit content:** Principle, types, specifications, operations on shaper, Types of planers, standard double housing plainer, construction, and operations. Introduction to construction and working of slotting machine
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 04 Unconventional Machining

No. of lectures-05

- **Prerequisite:** Machining of hard and complex surface with high accuracies and surface finish by using chemical mechanical thermal energy sources.
- **Objectives:**
 1. To study about working principle of unconventional machine
 2. To study about important and application unconventional machine.
- **Outcomes:**
 1. To know about machining of hard surface and how to achieve good surface finish.
 2. Able to know about selection of particular unconventional machine for given job.
- **Unit content:** Introduction, classification, significance of Unconventional machining, Electrical discharge machining (EDM), Electrochemical Machining (ECM), Ultrasonic machining (USM), Abrasive Water Jet Machining (AWJM) Principle, working, applications, advantages, limitations.
- **Content Delivering Methods:** Board, Chalk and Talk.

SECTION II

Unit No 5: Milling Machines

No. of lectures-07

- **Prerequisite:** it is a machine tool in which metal is removed by means of a revolving cutter with many teeth each tooth having a cutting edge which removes metal from a work piece.
- **Objectives:**
 1. To study about horizontal and vertical milling machine and their various parts.
 2. To study about various attachment used on milling machine for various operation.
- **Outcomes:**
 1. To know about how to manufactured gear and sprocket on milling machine.
 2. Able to select various type of cutter and its use.
- **Unit content:** Classification of Milling Machines, construction and working of column and knee type milling Machines, Milling methods – Up milling and down milling, Milling operations, Gear cutting on milling machines, indexing methods, Numerical on Indexing Methods
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 6: Grinding Machines

No. of lectures-06

- **Prerequisite:** it is a machine tool in which metal is removed by means of a revolving cutter with many teeth each tooth having a cutting edge which removes metal from a work piece.
- **Objectives:**
 1. To study about horizontal and vertical milling machine and their various parts.
 2. To study about various attachment used on milling machine for various operation.
- **Outcomes:**
 1. To know about how to manufactured gear and sprocket on milling machine.
 2. Able to select various type of cutter and its use.
- **Unit content:** Classifications – Cylindrical, Center less, Surface grinder etc, Selection mounting, glazing, loading, truing, balancing, Surface finishing process, Honing, Lapping, super finishing.
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 7: Boring Machine

No. of lectures-02

- **Prerequisite:** it is a machine tool in which metal is removed by means of a revolving cutter with many teeth each tooth having a cutting edge which removes metal from a work piece.
- **Objectives:**
 1. To study about horizontal and vertical milling machine and their various parts.
 2. To study about various attachment used on milling machine for various operation.
- **Outcomes:**
 1. To know about how to manufactured gear and sprocket on milling machine.
 2. Able to select various types of cutter and its use.
- **Unit content:** Horizontal and vertical boring machines, construction and working, Boring tools and bars, Jig boring machines
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 8: Gear manufacturing processes

No. of lectures-03

- **Prerequisite:** it is a machine tool in which metal is removed by means of a revolving cutter with many teeth each tooth having a cutting edge which removes metal from a work piece.

- **Objectives:**
 1. To study about horizontal and vertical milling machine and their various parts.
 2. To study about various attachment used on milling machine for various operation.
- **Outcomes:**
 1. To know about how to manufactured gear and sprocket on milling machine.
 2. Able to select various types of cutter and its use.
- **Unit content:** Gear Hobbing, gear broaching, Gear finishing processes, gear shaving, gear burnishing
- **Content Delivering Methods:** Board, Chalk and Talk.

Unit No 9: Introductions to CNC & VMC Machine

No. of lectures-02

- **Prerequisite:** it is a machine tool in which metal is removed by means of a revolving cutter with many teeth each tooth having a cutting edge which removes metal from a work piece.
- **Objectives:**
 1. To study about horizontal and vertical milling machine and their various parts.
 2. To study about various attachment used on milling machine for various operation.
- **Outcomes:**
 1. To know about how to manufactured gear and sprocket on milling machine.
 2. Able to select various types of cutter and its use.
- **Unit content:** Construction and working of CNC & VMC machine tools, Classification of CNC.
- **Content Delivering Methods:** Board, Chalk and Talk.
- **Internal Continuous Assessment (ICA)**
 1. Setting the lathe machine for taper turning by swiveling compound rest.
 2. Setting the lathe machine for taper turning by set over of tail stock and taper turning attachment.
 3. Setting the lathe machine for thread cutting operation.
 4. Study and demonstration of attachments on milling machine.
 5. Study and demonstration of various types of milling cutters.
 6. Setting the milling machine for gear cutting operation.
 7. Setting the Hobbing machine for gear cutting operation.
 8. Study and demonstration of various types of grinding wheels and their specifications.
 9. Visit to at least one machine shop and one CNC shop.
 10. Study and demonstration of broaching operations

Note: Any Eight of the above exercises are expected. Journal based on above exercises shall be prepared by the Students.
- **Text Books:**
 1. Workshop Technology (Volume II) by Hajra Chowdhary.
 2. Workshop Technology (Volume II) by Raghuvanshi
 3. Production Technology (Volume II) by Gupte-Patel.
 4. Workshop Technology (Volume II) by W.A.J.Chapman.
 5. Manufacturing Technology-P.N.Rao Vol. II.

Solapur University, Solapur

S. E. (Mechanical Engg.) Semester-I

ME227 WORKSHOP PRACTICE – III

Teaching Scheme:

Examination Scheme: Practical: 2

Hours / week

ICA: 50 marks

-
- **Course Prerequisite:-** fundamental machine shop instruction involving safety use and care of hand and measuring tools basic operation of all conventional machines and grinding of single point tools, screw threads and taper turning and their application classes of fits and tolerances are stressed students will be provided the opportunity to learn and practice bench work skills.
-

- **Course Objectives:**

1. To get hands on experience of machining techniques such as grinding, drilling, shaping, turning etc. studied in theory subjects.
 2. To develop skills to operate different machine tools.
 3. To get hands on experience in pattern making, joining processes and forming processes.
 4. To develop skills in pattern making and sheet metal work
-

- **Course Outcomes:** At the end of this course, the student will be able

1. To operate different machine tools such as grinders, lathes, drilling machines etc.
 2. To machine the component as per specified dimensions.
 3. To develop the skills necessary for engineering practices like joining and forming processes.
 4. To Choose and apply the appropriate methods for pattern making & sheet metal working
1. **Tool Grinding – Demonstration and actual grinding to understand the tool geometry (01 turns)**
 2. **One composite job in M.S. consisting of one components and inclusive of following operation shall be performed by students: Turning, Step turning, , Chamfering, Grooving, , Knurling, . At least one dimension of the job shall carry close tolerance (04turns)**
3. Preparation of process sheet for the above job (01 turns)

Note: Students shall prepare a work book involving brief write up regarding machine/machines employed for job. Students should prepare a work book which involves a process sheet for each job and inspection report of the job. Based on the job performed, attendance record, work book, internal viva, faculty members may evaluate the term work.

- **Books:**

1. Workshop Technology (Volume II) by Raghuvanshi.
2. Workshop Technology (Volume II) by HajraChowdhary.
3. Workshop Technology (Volume II) by W.A.J.Chapman.
4. Production Technology by P.C.Sharma.
5. Production Technology – HMT Handbook. 6. Production Technology (Volume II) by Gupte-Patel.
6. P.L.Jain, Principles of Foundry Technology.
7. P.N.Rao, Manufacturing Technology: Foundry, Forming and Welding.
8. Workshop Technology (Volume II) by W.A.J.Chapman. 6. Production Technology – HMT Handbook.

T.E. –Mechanical - Part-I
Professional Elective -I
5.2 FLUID MACHINERY & FLUID POWER

Teaching Scheme
Lectures : 3 Hrs/Week
Practicals : 2 Hrs/Week

Examination Scheme
Theory : 100 Marks
Term Work: 25 Marks

Course objectives:

- 1.To study different types of water turbines, Gas turbines and Pumps, in all details..
- 2.To construct velocity triangles for turbines and pumps.
- 3.To learn the fundamentals and applications of fluid power technology, besides construction & working of different components.
- 4.To design various types of hydraulic & pneumatic circuits & their applications.

Course outcomes:

At the end of this course, the student will be able to

- 1.Classify turbines and pumps. Select/design water turbines, gas turbines & centrifugal pumps to meet the specific requirements.
- 2.Draw velocity triangles for turbines and pumps.
- 3.Analyse different components of hydraulic and pneumatic systems.
- 4.Prepare different hydraulic & pneumatic circuits needed for different applications.

SECTION -I

1.Impulse Water Turbines :

(05)

Euler's equation for rotodynamic machines, Classification of water turbines, Pelton wheel, Work done and efficiencies of Pelton wheel, Working proportions of Pelton wheel, Design of pelton Turbine runner, Governing of Pelton turbine, Performance characteristics of Pelton turbine .(Numerical Treatment)

2.Reaction Water Turbine:

(05)

Construction and Working of Francis, Kaplan turbine. Work done and efficiencies of Francis & Kaplan turbine, Working Proportions of Francis & Kaplan turbine, Specific speed of turbine (Pelton, Francis & Kaplan turbine), Model testing, unit quantities, Prediction of performance at other operating conditions, Draft tube (Theoretical treatment only), Types and function, Governing of reaction turbines, Performance characteristics of Francis & Kaplan turbine. (Numerical Treatment).

3. Centrifugal Pumps: (05)

Working principle, construction, types, various Heads, multistage pumps, Velocity triangles, Minimum starting speed, Cavitation, Maximum Suction Height & Net Positive Suction Head, Methods of priming, Calculations of efficiencies, Discharge, blade angles, Heads, Power required, impeller dimensions, specific speed of pumps, Performance characteristics of pumps. (Numerical Treatment)

4. Gas Turbines: (05)

General aspects, Classification of gas turbines, merits of gas turbines, constant pressure combustion gas turbines-open cycle gas turbine, methods for improvement of thermal efficiency of open cycle gas turbine plant-intercooling, reheating, regeneration, effect of operating variables on thermal efficiency, closed cycle gas turbine, uses of gas turbine, gas turbine fuels. (Numerical Treatment on basic Joule Cycle)

SECTION – II

1. Introduction to Fluid Power and Hydraulic System elements : (05)

Types, advantages, applications of fluid power, Pumps- Types, working, Characteristics, Applications. Seals & Packing- Types, materials, Applications. Hydraulic Actuators- Linear & Rotary, Types, Working, Cushioning effects, Calculation of force & velocity of piston. System components: Accumulators, Intensifiers, their types, working, applications. Symbols used in hydraulic and pneumatic circuits.

6. Pneumatic System Elements : (05)

Piping, materials and pressure ratings, piping layout, air compressors, types, working, selection criteria, FRL unit, construction and working, pneumatic cylinders and air motors, construction and working, types.

7. Hydraulic and Pneumatic Control Elements : (05)

Hydraulic - Pressure control valves- Direct acting type, pilot operated, sequence, counter balancing, unloading, pressure reducing, Construction & Working. Direction control valves- Types, construction & working, Spool actuation methods, spool centre positions, Flow control valves- Compensated & Non-

Compensated, Construction & Working. Pneumatic -Direction control valves, Flow control valves and pressure control valves–types and working.

8. Hydraulic and Pneumatic Circuits & their applications :

(05)

Speed control circuits, Regenerative, Sequencing, Counter balancing, Synchronizing, Traverse & Feed circuit, Hydraulic and pneumatic clamping & braking systems, Pneumatic power tools, time delay circuits

Term-Work

Compulsory:

1. A drawing sheet on standard symbols of hydraulic & pneumatic components.

List of Experiments

A) Fluid Machinery-

Minimum 3 experiments from the following

2. Trial on a Pelton wheel.
3. Trial on a Francis/ Kaplan turbine.
4. Trial on a centrifugal pump.
5. Trial on gear pump

B) Fluid Power

Minimum 3 assignments from the following

6. Study of Pressure Control Valves & circuits using pressure control valves
7. Study of flow control valves & circuits using flow control valves
8. Study of direction control valves & check valves circuits.
9. Study of hydraulic power unit & accessories.
10. Demonstration of Minimum of Three hydraulic circuits such as :Basic hydraulic, Regenerative, Speed control(Meter in, meter out & bleed off), Sequencing, Synchronization, traverse & feed, circuit for riveting machine, automatic reciprocating, fail safe circuit, counter balance circuit, actuator locking, circuit for hydraulic press, unloading circuit, motor braking circuit.
11. Demonstration on Pneumatic Trainer of Minimum of Three Pneumatic circuits (based on syllabus of UNIT 10 above).

C) Industrial visit to one of the following.

- Hydro-electric power station
- Pumping station
- Service station of Earth Moving equipment's.

Note: Students should write visit report based on the observations made during the visit.

Text Books

1. “A text book of Fluid Mechanics & Hydraulic Machines”, Dr.R.K. Bansal, Laxmi Publications Ltd.
2. Thermal Engineering R.K. Rajput
3. “Oil Hydraulics- Principle & Maintenance”, Majumadar, Tata McGraw Hill
4. “Pneumatics- Principle & Maintenance”, Majumadar, Tata McGraw Hill

Reference Books

1. Theory of Hydraulic Machinery”, V.P. Vasandani, Khanna Publishers, Delhi.
2. “Hydraulic Machines”, Dr. J. Lal, Metropolitan Book Co. Pvt. Ltd., Delhi.
3. Vickers Manual on Industrial Hydraulics
4. Festo’s Manual on Pneumatic Principle, applications
5. “ABC’s of Hydraulic Circuits”, H L Stewart, (Taraporwala Press)
6. “ABC’s of Pneumatic Circuits”, H L Stewart, (Taraporwala Press)
7. Hydraulics and Pneumatics’ H.L.Stewart –, Industrial Press

Color, font, image, open, save dialogs, creating an application menu, adding and controlling forms, playing multimedia.

6.Scripting:

(02)

VBA macros create word and excel macros, advanced macros, VB script, writing script for internet explorer, scripting activeX objects, dynamic scripts.

7.String Processing:

(02)

Reading text files, Streaming lines of text, reading spreadsheets, reading XML files, creating XML dataset, RSS feed, XML attributes.

8.Database Programming:

(02)

Database in excel, designing a database, creating a database, defining tables, table relationships, creating a dataset, data controls, build SQL queries.

Termwork:

The term work is based on the following list of Computing Assignments.

Assignment on VB controls and events.

- 1) Programming exercises on Variables and parameters.
- 2) Programming exercises on branching and looping
- 3) Assignment on object methods and function procedures.
- 4) Programming exercises on Arrays.
- 5) Assignment on multimedia.
- 6) Programming exercises on VBA macros and scripting.
- 7) Programming exercises on string processing
- 8) Assignment on database.
- 9) Assignment on object oriented programming.

Text Books:

1. Introduction to Programming using Visual Basic
-David Schneider (Pearson Education System)
2. Microsoft Visual Basic 2010 Step by Step
-Michael Halvorson (Microsoft Press)
3. Visual Basic 6: The Complete Reference
-Noel Jerke (MGH)

Reference Books:

2. Visual Basic 2010 in Simple Steps -Kogent Learning Solutions (Dreamtech Press)

T.E. –Mechanical - Part-I

7.0 Workshop Practice – IV (T.E. Part - I)

Teaching Scheme
Practical: 2hrs/week

Examination Scheme
Term- Work – 25 Marks

Course Objective:

- i) To make the students aware with various skills involved in manufacturing & Assembly.
- ii) To develop skills to operate different machine tools.
- iii) To make the students aware of limits, fits & tolerance while manufacturing assembly.
- iv) To make students aware of operation sequence, speed feed selection for different materials & operations

Course Outcomes:

- i) To create confidence amongst the students in Production / manufacturing activities.
 - ii) Students should get experience about manual skills required to perform machining operations.
 - iii) To create confidence in students while designing limits, fits & tolerances during manufacturing.
 - iv) To create awareness in students regarding time management, work study, method study & tool engineering
-

1. A composite job consisting of three components machined from **Φ32 mm MS bar**.

(Excluding commercial components) requiring minimum five operations listed below:

1. Turning
2. Drilling
3. Boring
4. Hand tapping
5. Milling
6. Internal & External V-threading
7. Grinding

2. The components of the composite job shall carry at least two specified close tolerance operations. In addition to the above, following operations are to be demonstrated during the term. (These are not to be included in the job operations for term work & exams.)

1. Shaping
 2. Slotting
 3. Grinding
 4. Form Turning
 5. Knurling
 6. Grooving
4. Journal should contain detailed process sheet of above job.
5. Assessment of Workshop Practice-IV-Term work shall be done for 50 % Work or one major Component & Workshop Practice-V-Term work shall be done for remaining work at the end of T.E. (Mech.) Part II.
6. Practical examination of 6 Hrs. duration having component of 2 to 3 parts.

Note: Material specification for practical work & examination is raw material $\Phi 32\text{mm MS bar}$.

Books:

1. Workshop Technology (Volume II) by Raghuvanshi.
2. Workshop Technology (Volume II) by HajraChowdhary.
3. Workshop Technology (Volume II) by W.A.J.Chapman.

Reference Books:

1. Production Technology by P.C.Sharma.
2. Production Technology – HMT Handbook.
3. Production Technology (Volume II) by Gupte-Patel.
4. HGerling, All About Machine Tools, New Age International, 1995.

**T.E. –Mechanical - Part-I
8.0 Self Learning (HSS)**

**Examination Scheme
Theory Paper : 50 Marks**

Note: Syllabus is common for all branches of Engineering Faculty.

**T.E.(Mech.)Part-II
Metrology & Mechanical Measurements**

Teaching Scheme :
Lectures-3hours per week

Examination Scheme :
TheoryPaper:100 Marks

Practical- 2 hours per week

Term Work: 25 Marks

Course Objectives:

1. To study the principles of measurement of various mechanical properties such as geometrical, dimensional, pressure, temperature etc.
2. To learn the use of various measuring instruments with different setups for accurate measurements.
3. To get acquainted with various standards of measurements & the calibration process of Instruments.

Course Outcomes :

1. Students will understand the design & construction of measuring instruments.
2. Students will setup the Instruments & accessories for measurement of properties by avoiding errors.
3. Students will calibrate the simple instruments using more accurate standards.
4. Students will use the instruments for various industrial applications such as quality control, process control etc.

Section- I

1. Introduction : Standards of Measurement & Principles of measurement: (05)

Need & Concept of measurement, Precision and accuracy. Classification of standards, International standards of length, Line, End & Wave length standards, Slip gauges: Slip-gauge set (M-45,M-87) specification, Selection of slip Gauges including numerical problems. Measuring principles of vernier caliper & micrometer

2. Systems of Limits, Fits & Tolerances and Limit Gauging: (05)

Terminology, Types of tolerances, Accumulation of tolerances, Types of fits, Hole & shaft base systems of limits, fits and tolerances, Use of tolerance charts, Numerical problems based on fundamental deviations & fundamental tolerance grades. Taylor's Principal of gauge design, types of gauges, Design of limit gauges, Disposition of gauge tolerances & wear allowances, numerical problem on gauge design.

3. Comparators & angular measurements: (05)

Introduction to comparators, Characteristics, Classification of comparators, mechanical comparators-Johnson Mikrokator, Sigma Comparators dial indicators, Optical Comparators –Principles ,Pneumatic Comparators, Angular Measurements - Bevel Protractor, Spirit level, Clinometers, Principle & use of Sine Bars, Sine Centre, Use of angle gauges (Numerical on Building of angles) Autocollimator.

4. Screw-Threads & Gear Metrology & Recent trends in measurement: (05)

Basic elements of screw-thread measurement, Methods of measurement of effective diameter, floating carriage micrometer. Basic elements of spur-gear measurement, Methods of measurement of gear tooth thickness. Introduction to modern measurement techniques- Co-ordinate Measuring Machine, Profile projector, Introduction to laser

Measurement, Metrology & Automatic inspection system.

Section- II

5. Introduction to Mechanical Measurement: (05)

Need of Mechanical Measurement, Instruments, Measurement methods, Generalized measurement system & its functional elements, Instrument characteristics-Static & Dynamic characteristics, Calibration, Classification of transducers.

6. Measurement of temperature, Pressure & Vacuum: (05)

Importance of temperature measurement, Thermometer, Thermocouple-Principle, Types, Calibration, RTD, Thermistor. Importance of pressure & Vacuum measurement, Range of high pressure & vacuum Bourdon tubes, Dead weight pressure-gauge tester, Diaphragm gauge, LVDT, Piezo-electrical pressure gauge, Low vacuum gauges-McLeod gauge, Pirani gauge.

7. Measurement of angular speed & flow: (05)

Importance of angular speed measurement, Mechanical tachometers, Electrical tachometers- Drag cup, Inductive, Photoelectric pickup, Stroboscope. Importance of Flow measurement, Turbine meter, Rotameter, Gas flow meter, Hot wire anemometer.

8. Measurement of Force, Torque & Strain: (05)

Force measurement- Balance, Proving Ring, Hydraulic, Pneumatic Load Cell, Torque measurement- Hydraulic, Eddy Current. Classification of strain gauges, Principle of electrical strain gauge, Gauge factor (Analytical treatment), Wheatstone's network using strain gauges. Simple Numerical problems.

(5)

TERM-WORK

A) Metrology Laboratory :

Any five of the following experiments (Experiment No. 1 is compulsory).

1. Uses of various measuring instruments .Vernier instruments, Micrometer instruments, Dial instruments and Auxiliary instruments for carrying out measurements.
2. Calibration of Vernier caliper / Micrometer using slip gauges.
3. Use of at least one type of each class of comparator such as mechanical, optical, pneumatic, etc.
4. Measurement of angle using Bevel protractor and sine bar / sine centre. Use of Clinometer and Angle gauges.
5. Measurement of Gear tooth thickness using gear tooth vernier caliper/ plate type micrometer
6. Measurement of diameters of screw threads.
7. Use of advanced measuring equipment such as Co-ordinate Measuring Machine / Metro scope/ Profile projector.

B) Mechanical Measurements Laboratory

Any five out of the following experiments:

1. Temperature Measurement using thermo couples, RTD, Thermistor.
2. Testing of mechanical pressure gauge using Dead Weight pressure tester.
3. Vacuum measurement using U tube manometer & Mechanical Vacuum Gauge.
4. Angular speed measurement using mechanical tachometer ,stroboscope, photo electric pick up, inductive pick-up.
5. Flow measurement using Rotameter.
6. Measurement of bending strain or load using strain gauges.
7. Use of proving ring,load cells.
8. Measurement of torque.

* Industrial Visit (Recommended for modern measuring instruments/ Calibration Lab)

Text Books:

1. Engineering Metrology: I.C. Gupta
2. Mechanical Measurement & Control: Dr.D.S. Kumar
3. A Text Book Metrology : M. Mahajan

Reference Books :

1. Practical Engineering Metrology: Sharp KWB, Pitman, London.
2. Engineering Metrology: R.K.Jain, Khanna Publishers.
3. Mechanical Measurement: Sohni & Dr. Radhakrikshan.
4. Mechanical Measurement: Beckwith, Buck, Roy

(NOTE: SEPARATE ANSWER BOOKS FOR SECTION -I & SECTION-II)

T.E. (Mechanical) Part – II

2.0 Internal Combustion Engine

Teaching Scheme
Lecturers: 3 Hrs/ Week
Practical: 2 Hrs/ Week

Examination Scheme
Theory: 100 Marks
Term work: 25 Marks

Course Objective:

1. Learn to classify different types of internal combustion engines and their applications.
2. To make students familiar with the design and operating characteristics of internal combustion engines.
3. To study the thermodynamics, combustion, heat transfer, friction and other factors affecting engine power, efficiency and emissions.
4. To introduce students to future internal combustion engine technology and market trends.

Course Outcomes :

1. To recognize and understand the reasons for differences in the construction of different types of internal combustion engines.
2. To understand the reasons for differences among operating characteristics of different engine types and designs
3. To elect the appropriate engine for a given application.
4. To conduct performance tests on engines and Compare experimental results with theoretical predictions.
5. To compare experimental results with theoretical predictions and make proper justifications for

Section I

1. Introduction to I.C. Engines & Engine Cycles:

(06)

Introduction, Basic engine components and nomenclature, Classification of I. C. Engines. Engine cycles, Deviation of actual cycles from air standard cycles, Valve timing diagram for high & low speed engine, Port timing diagram. Engine selection.

(Theoretical treatment only)

2. Fuel systems for S.I. Engines:

(05)

Engine fuel requirements, Elementary and complete carburetor (Float, Idling and Acceleration system, Choke, Compensating system, economizer), Derivation for calculation of A/F ratio (exact and approximate method), Design of carburetor - Calculation of main dimensions of air and fuel supply, Effect of altitude on Air fuel ratio. Electronic Petrol injection system (MPFI)

(Numerical on calculations of main dimension of carburetor)

3. Fuel Systems for C.I. Engines:

(05)

Requirements of injection system, Fuel metering, pressurizing and injecting system, Types of injection system- Individual pump, Common rail and Distributor systems, Unit injector, Types of fuel nozzles- single hole, multi hole, pintle, and pintaux, Formation of Spray, Atomization and penetration. Governing of C.I. engines. Electronic control for diesel engine management,
(Numerical on calculations of main dimension of fuel injection system).

4. Engine systems.

(04)

- Ignition system: (Magneto, CDI, Electronic)
- Lubrication system (types of lubrication systems and lubricants)
- Engine starting system. (Starter motor, Bendix drive,)
- Engine cooling system (Cooling system types, coolants)
- Intake and exhaust systems (Intake manifold, intake runners, exhaust manifold, muffler)
(Theoretical treatment only)

Section II

5. Combustion in Engines:

(06)

Combustion In SI Engine: Stages of combustion, Ignition lag, Flame propagation, Factors affecting flame speed, Abnormal combustion, Influence of engine design and operating variables on detonation, Requirements of combustion chambers of S. I. Engines. (Theoretical treatment only)

Combustion in C.I. Engines: Stages of combustion, Delay period, Factors affecting delay period, Abnormal combustion - Diesel knock, Influence of engine design and operating variables on diesel knock, Comparison of abnormal combustion in S I and C I engines,. Requirements of combustion chambers for C. I. engines. (Theoretical treatment only)

6. Engines testing and performance enhancement:

(06)

Engines testing:- Performance parameters, Performance curves, Measurement of performance parameters like torque, power, Volumetric Efficiency, Mechanical Efficiency, BSFC, Brake and Indicated Thermal efficiencies. Heat Balance Sheet. (Numerical on engine performance)

Performance enhancement: Introduction to method of improving engine performance.

Supercharging:- Purpose of supercharging, Thermodynamic cycle of supercharged engine, Types of superchargers, Turbo charging, Advantages and disadvantages, Limitations of supercharging for S.I. and C.I. Engines. (Theoretical treatment only)

7. Fuels

(04)

SI Engine fuel: Fuel rating, Octane number, Fuel additives, HUCR

CI Engine fuel: Cetane number, Additives

Alternative fuels: Alternative fuel for S. I. Engines & C. I. engines, Blending, Use of CNG, Bio-gas, Non-edible oils, Ethanol, Methanol, Hydrogen, Electronic engine management system for variable valve timing, fuel supply and pollution control. Introduction to hybrid vehicles. (*Theoretical treatment only*)

8.Engine Emission and Engine electronics:

(04)

S.I. engine emission (HC, CO, NO_x) Control methods- Evaporative (ELCD), Thermal, Catalytic converters, C.I. Engines Emission (CO, NO_x, Smog, Particulate), Control methods- Chemical, EGR, Standard pollution Norms – Bharat-I,II,III. Introduction to carbon credit. Engine electronics. (*Theoretical treatment only*)

Term Work

Minimum **four** experiments from Study Group and Test Group Each.

Study Group:

- 1 Constructional details of I.C. engines
- 2 Study of Engine systems: Air, exhaust, Cooling, Lubrication
- 3 Study of ignition systems, Starting systems.
- 4 Dismantling and assembly of Carburetor or injection system.
- 5 Dismantling and assembly of engine
- 6 Study of fuel injection system of diesel engine
- 7 Assignment on latest trends in IC Engine.

Text Group:

1. Test on four stroke Diesel Engine.
- 2 Test on four stroke Petrol Engine.
- 3 Morse Test.
- 4 Test on computer controlled I.C. Engine
- 5 Measurement of exhaust emissions of SI / CI engines.
- 6 Test on variable compression ratio engine, to predict the effect of variable compression ratio on I.C.Engine performance.
- 7 Visit to an engine manufacturing company / repairing unit

Text book

T.E. (Mech) Part –II

3.0 Computer Aided Design & Computer Aided Manufacturing (CAD/CAM)

Teaching Scheme:
Lectures: 3Hrs/Week
Practical: 2Hrs/Week

Examination Scheme
Paper: 100 Marks
Term Work: 25 Marks

Course objectives:

1. To create an awareness regarding Geometric Modeling activities in Industries.
2. To create an awareness regarding CAM activities in Manufacturing Industries.
3. To develop part programming capabilities for CNC machines.
4. To empower students to learn advanced tools in Automation.

Course Outcomes:

1. To handle CAD related problems from industries.
2. To handle CAM related problems of manufacturing industries.
3. To learn CAD/CAM softwares to be updated with time.
4. To design NC Part Programs to suit Industrial requirements.

Section-I

1. Introduction to CAD / CAM: (04)

Product Design Concept, Product Cycle and CAD / CAM, Advantages of CAD / CAM, Hardware for standalone CAD system, Graphics Workstation, Types of Input Devices, CPU and Output Devices, Softwares for CAD / CAM, Functions of a Graphics Software, Selection of CAD / CAM Software

2. Computer Graphics: (05)

Geometric Transformations, Homogeneous Coordinates, Windowing and Viewing Transformations, Coordinate Transformations, Standardization in Graphics Software, CAD / CAM Data Exchange.

3. Geometric Modeling: (05)

Introduction, Types of Geometric Modeling, Parametric representation of basic entities like line and circle, Introduction to basic curves - Hermite, Bezier, B-Spline, NURBS, concept of CSG and Boolean operations, Feature based modeling.

4. Automation: (06)

Concept & Definition of Automation, Types, Advantages and Limitations of Automation, Group Technology, part family, Classification and Codification System, Merits and Demerits of Group Technology, Concept of a Machine Cell, CAPP, Retrieval and Generative type of CAPP, Computer Integrated Manufacturing (CIM) concept and elements, MRP, concept of ERP, concept of Rapid Prototyping.

5. Fundamentals of NC system:

(06)

Evolution of NC and Retrofitting, Elements of NC Manufacturing System, concept of work zero and machine zero, Types of NC systems, Structure, Drives and other devices, Steps in NC Manufacturing, Advantages and Disadvantages of NC Technology, Flexible Manufacturing System (FMS), Elements of FMS, Applications of FMS, Merits and Demerits in FMS.

6. CNC- DNC Technology:

(03)

Classification of CNC machine tools, CNC controllers, Features and Advantages of CNC, Adaptive Control, Advantages of Adaptive Control, Direct Numerical Control (DNC), Types of DNC, Advantages and Disadvantages of DNC.

7. Tooling for CNC Machines:

(03)

Tool holders, Adapters, Tool magazines, Automatic tool changers, Pallets, Tool setting, Modular tooling.

8. Manual Part Programming:

(08)

Principles of an NC Program, Word Address Format (WAF), Machining Formulas, Tool Length and Cutter Diameter Compensation, Canned Cycles for Lathe, Milling and Drilling, Subprogram or Subroutines, DO Loop, Macros, Diameter versus Radius Programming, CAD / CAM Systems for Part Programming.

List of Experiments

1. One assignment on CAD/CAM fundamentals/basics.
2. Assignment on Modeling & Drafting of any two mechanical components.
3. Assignment on Modeling of simple Assembly of around 3-5 machine components.
4. Assignment based on group technology and /or Computer Aided Process Planning (preferably based on small part family).
5. Part programming of one job using CAM software or Programming and manufacturing of one job on CNC lathe or CNC Milling machine.
6. Assignment based on Industrial visit and its report based on CNC/FMS/Automation.

Text books:

1. Introduction to CAD/CAM, Rao P.N., -Tata McGraw Hill Publishing Co.
2. Automation, Production Systems and Computer Integrated Manufacturing, Grover M.P.- Prentice Hall of India
3. Numerical Control -Computer Aided Manufacturing, Kundra, Rao, Tiwari- Tata McGraw Hill Pub.Co.
4. CAD/CAM/CAE, Chougule N.K.- SCITECH Publications (I) Pvt. Ltd.
5. CAD/CAM/CIM, P. Radhakrishanan.

Reference Books:

1. Theory and Practice , Ibrahim Zeid – CAD/CAM - Tata McGraw Hill Publishing Co.
2. CAD/CAM - Mastering , Ibrahim Zeid --Tata McGraw Hill Publishing Co.
3. Computer Integrated Design and Manufacturing , D.D. Bedworth, M.R Henderson & P.M. Wolfe- -Tata McGraw Hill Pub. Co.
4. CAD/CAM Theory and Concepts, Kuldeep Sareen, C.Grewal, -S.Chand & Co.Ltd.
5. Computer Graphics by Hearn and Baker.

TE (Mech) Part- II
Professional Elective – II
5.3 Tool Engineering

Teaching Scheme :
Lectures : 3 / week
Practicals : 2 hrs./ week/ batch

Examination Scheme :
Theory : 4 hrs. 100 marks
Term work -25 marks

Course Objectives

1. To enlighten the students about the basics in mechanics of cutting & non cutting operations.
2. To explain the concepts, principles & practices in designing various tools .
3. To explain the students about the basics in economics of cutting & non cutting operations.
4. To explain the concepts, principles & practices in designing various toolings.

Course Outcomes

1. Students are able to do the calculations involved in the mechanics & economics of operations.
2. Students are able to design & draw the tools & toolings for the given situation & operation.
3. Students are able to conceive & develop solutions, devices, contrivances to overcome present problems of the real world.

SECTION - I

1. Theory of Metal cutting

- a) Orthogonal cutting & Oblique cutting, Force analysis for orthogonal cutting (1)
- b) Chip formation, types of chips, wedge action, shear plane angle, cutting ratio, shear stress & strain, velocity relationship, Merchant's theory, Merchant's circle & force relationship (3)
- c) Tool dynamometers- types, applications. (1)
- d) Machinability Index, factors affecting machinability (1)
- e) Tool life- Flank & crater wear, effect of variables on tool life, Taylor's equation of tool life (2)
- f) Coolants- Heat generation, types of coolants. (1)
- g) Tool Materials (1)

2. Press Tools

- a) Elements of press tools, types of dies, types of operations. (2)
 - b) Design of die for cutting operation, mechanics of shearing, cutting force estimation, punch & die clearance, stock strip lay out, design of punches & die block functioning & place of other elements. Centre of pressure, selection of die set & press (5)
 - c) Design of drawing dies, determination of blank size, no. of draws, stage wise component drawing, drawing radii, clearance, estimation of drawing force, time & power (2)
 - d) Types of Bending dies, related estimates (1)
-

SECTION –II

3. Geometry & Nomenclature of cutting tools

- a) Single point cutting tools- Geometry & Tool signature as per ASA system & ORS system, effect of geometry on tool life, cutting force, surface finish. (2)
- b) Types of Multipoint cutting tools like Milling cutters, Drills, Broaches, Reamers (2)

4. Design of Jigs & Fixtures

- a) Introduction, necessity & applications, basic concepts (1)
- b) Location & clamping systems- Principle, types, applications (2)
- c) Design of Jigs- Principles of Jig design, types & applications, types of bushes & selection, use of standard parts, design procedure & drawing. (4)
- d) Design of Fixtures- Principles of Fixture design, standard elements & types of fixtures, design of milling fixtures. (4)

5. Economics of Tooling

- a) Elements of cost: methods of depreciation (1)
- b) Estimation of total cost & sales price (1)
- c) Break- even analysis for equipment selection (1)
- d) Economics of small tool selection, equipment replacement (1)
- e) Economic Order Quantity for Batch production (1)

TERM WORK

(Minimum Six of the following)

1. Study of cutting tools : Classification, Nomenclature, Geometry
2. Exercise on Theory of metal cutting.
3. Demonstration of Lathe tool & Drill tool dynamometer & calculation of cutting forces.
4. Exercises on Mechanics & Economics of Machining & Tooling
5. Sheet on Press tool design- Cutting & drawing operation, necessary calculation
6. Sheet on Jig design- Exercise & drawing
7. Sheet on Fixture design- Exercise & drawing
8. Industrial visit

RECOMMENDED BOOKS:

TEXT BOOKS

1. Text Book of Production Engineering – P.C.Sharma (S.Chand Publication)
2. Machine Tool Engineering – G.R. Nagpal (khanna Publication)
3. Press Tools – P.H.Joshi (S.Chand Publication)
4. Jigs & Fixtures - P.H.Joshi (S.Chand Publication)

REFERENCE BOOKS

1. Metal cutting Theory & tool design- Mr. Arshinnov (MIR Publication)
2. Fundamentals of Tool design- ASTME Publication
3. Tool design – Donaldson (TMH Publication)
4. Jig & Fixture Design – Kempster (ELBS Publication)
5. Die Design Fundamentals-J.R.Paquin

T.E. (Mechanical) Part – II
7.0 Workshop Practice – V

Teaching Scheme
Practical: 2hrs/week

Examination Scheme
Term- Work – 25 Marks
Practical Examination-50Marks

Practical Exam duration- 6 Hrs.

Course Objective:

- v) To make the students aware with various skills involved in manufacturing & Assembly.
- vi) To develop skills to operate different machine tools.
- vii) To make the students aware of limits, fits & tolerance while manufacturing assembly.
- viii) To make students aware of operation sequence, speed feed selection for different materials & operations

Course Outcomes:

- i) To create confidence amongst the students in Production / manufacturing activities.
- ii) Students should get experience about manual skills required to perform machining operations.
- iii) To create confidence in students while designing limits, fits & tolerances during manufacturing.
- iv) To create awareness in students regarding time management, work study, method study & tool engineering

1. A composite job consisting of three components machined from **Φ32 mm MS bar**.

(Excluding commercial components) requiring minimum five operations listed below:

- 1. Turning
 - 2. Drilling
 - 3. Boring
 - 4. Hand tapping
 - 5. Milling
 - 6. Internal & External V-threading
 - 7. Grinding
-

2. The components of the composite job shall carry at least two specified close tolerance operations. In addition to the above, following operations are to be demonstrated during the term. (These are not to be included in the job operations for term work & exams.)

1. Shaping
2. Slotting
3. Grinding
4. Form Turning
5. Knurling
6. Grooving

4. Journal should contain detailed process sheet of above job.

5. Assessment of Workshop Practice-IV-Term work shall be done for 50 % Work or one major Component & Workshop Practice-V-Term work shall be done for remaining work at the end of T.E. (Mech.) Part II.

6. Practical examination of 6 Hrs. duration having component of 2 to 3 parts.

Note: Material specification for practical work & examination is raw material $\Phi 32\text{mm MS bar}$.

Books:

3. Production Technology (Volume II) by Gupte-Patel.
4. HGerling, All About Machine Tools, New Age International, 1995.

T.E. (Mechanical), Semester - II

Self Learning (Technical)

Teaching Scheme:-- Nil

Examination Scheme: Nil

Term Work – 50 Marks

Course Objective:

- i) To develop the ability for self study
- i) To make the students acquainted with various skills involved in presenting a data.
- ii) Student is expected to understand & analyze the basic problems in engineering.

Course Outcomes:

- i) Outcome is to create confidence amongst the students in the field of engineering.
- ii) Students should get experience about case study.

1. Mini Project/Case study: 30 Marks

A mini project /case study is expected to be on a state of the art technical topic, related to Mechanical Engineering discipline. Every individual or a group of maximum two students shall work on a area/topic, selected or assigned from any engineering/allied/applied fields, for the academic or industrial interest. The task may be like:

- A work/task can be completed using software tools like CAD tools, MALAB SCILAB, AUTOLISP, or any Programming Languages.
- Animation, simulation oriented task.
- Making a prototype, working model, attachment/extension to machine tool/equipment.
- Design of element, mechanism, product, subassembly etc.
- Experimentation with critical task like using IC engine, Hydraulic trainer circuit, Vibration analysis or using any working experimental set-up.

Such similar kind of task/case in the field of Mech. Engg., can be taken for mini project.

For this mini project the report should be prepared and student has to present it and demonstration to the expert panel appointed by HOD.

The Term work marks will be allotted as per the following :

- i) Report 10 Marks
- ii) Theme/content, Presentation and question-answer : 20 Marks

2. A) Paper Presentation 20 Marks

OR

B) Seminar 20 Marks

A) Paper Presentation :

A research paper is expected to be on a state of the art technical topic, related to Mechanical Engineering discipline. Every individual or a group of maximum two students shall work on a area/topic, selected or assigned from any engineering/allied/applied fields, for the academic or industrial interest. Student shall work on a recent/advanced topic, recent development/research work, may be selected by them or assigned from any engineering/allied/applied fields, for the academic or industrial interest. The student shall prepare the research paper and participate/submit for any competition/conference may be of university level/state level/national level/international level. The student has to produce the proof for the same in the form of certificate of selection/attendance/paper presentation, at the competition/conference, a copy of souvenir/proceeding etc.

For this the report including research paper should be prepared and student has to present it to the expert panel appointed by HOD.

The Term work marks will be allotted as per the following:

- i) Research paper: 10 Marks
- ii) Presentation and question-answer: 10 Marks

B) Seminar:

A seminar is expected to be on a state of the art technical topic, related to Mechanical Engineering discipline. Every individual student shall work on a recent topic selected or assigned from any engineering/allied/applied fields for the seminar of academic or industrial interest. It is expected that the student may collect information on a topic which is not covered in curriculum of the under graduate course. Student has to refer hand book, latest research papers, research journals, reference books, proceeding of conference through library or internet and record of references considered for seminar is too preserved in hard copy or soft copy, which shall be produced at the time of seminar. The seminar report & its presentation are to be based on content material, mainly collected & analyzed from above. The report of seminar should be submitted in printed volume (about 10-20 pages) duly certified by guide. The student should deliver a seminar talk at least for 20 minutes based on the work done by him/her. The performance will be judged by expert panel appointed by HOD. Presentation shall be made with help of Power point (Guidelines)-

- a. Preferably each slide shall have plain white or faint yellow or navy blue or maroon colored back ground with contrast matching font.
- b. Each slide shall be numbered and header - footer shall be added similar to report.
- c. Figure / Graph / Table shall be labeled with Figure No. / Graph No. / Table No. and with reference nos. Shown in seminar report
- d. Only brief points are to be highlighted on slides
- e. Points are not to be read directly from slide at the time of presentation.
- f. Presentation shall be based on Figure, Graph, Table, Charts and points etc.
- g. First slide shall be identical to cover page of report.
- h. Second slide should contain introduction / abstract of seminar and content of presentation with bullets.
- i. Third slide shall focus on literature review.
- j. Fourth slide on wards core content of presentation shall be discussed.
- l. Slides at the end shall consist of merits, demerits, future scope, conclusion and references.

The Term work marks for seminar will be allotted as per the following

- i) Seminar Report : 08 Marks
iii) Presentation and question-answer : 12 Marks

Professional Elective-4: Mechatronics, Computational Fluid Dynamics, Production and Operation Management

Free Elective –II: Software Engineering & cyber security, Agro Machine Engineering, Plastic Engineering and Economics for Engineers

Note :

1. Batch size for the practical /tutorial shall be of 15 students. On forming the batches, if the strength of remaining students exceeds 07, then a new batch shall be formed..
2. Project group for B.E. (Mechanical) Sem. I and Sem. II shall not be of more than **four** students.
3. Practical / Tutorial load indicates the load per batch.
4. ICA assessment shall be a continuous process based on the performance of student in assignment, class test, quizzes, homework, interaction during theory and laboratory session, hand written lab book/ hand written journal, sheet drawing, subject seminar presentation etc. as applicable.
5. For Elective -: To offer a particular subject as an Elective, minimum 15 students should opt for the same. Appropriate Electives Subjects may be added when required.

3. Refrigeration and Air Conditioning

Teaching Scheme:
Lectures: 3 Hrs. / Week

Practical: 2 Hrs. / Week

Examination Scheme:
ISE-30 Marks

ESE-70 Marks

ICA- 25 marks

Oral Exam. 25Marks

Course objective:

1. To Study basic refrigeration cycles and air refrigeration systems.
2. To study different refrigerants and multi pressure refrigeration systems
3. To Study Psychometric properties of air and human comfort conditions
4. To study and design of air conditioning systems

Course outcomes:

At the end of course a student can be able to

1. Analyze basic refrigeration cycles and air refrigeration systems
2. Select proper refrigerant and appropriate refrigeration system based on application
3. Define and estimate psychometric properties
4. Estimate cooling and heating load calculations and design air conditioning system for different applications.

Section – I

1. a)Basic Refrigeration Cycles:

Refrigeration, Units of Refrigeration, Reversed Carnot cycle, Bell-Coleman cycle, Types of Vapour Compression Cycles, Calculations & performance of above cycles, Actual vapour compression cycle. (Numerical Treatment) (7 hrs)

b) Air Refrigeration systems for Air Craft Refrigeration:

Necessity of air cooling for air craft, Simple system, Boot strap system, Regenerative system, Reduced ambient system (Descriptive Treatment) (3hrs)

2. Multi pressure systems:

Introduction, Multistage compression, Flash gas removal, flash inter cooling, complete multistage compression system, Multi evaporator systems (Descriptive Treatment) (3 hrs)

3. Refrigerants:

Classification, Desirable properties, Nomenclature of refrigerants, Selection of refrigerant, Secondary refrigerants, Effect on ozone depletion & Global warming, Total equivalent warming impact (TEWI), Alternative refrigerants, Nan refrigerant (Descriptive Treatment) (3hrs)

4. Vapour Absorption System:

Simple aqua-ammonia vapour absorption system, Practical aqua-ammonia vapour absorption system, Comparison between vapour absorption & vapour compression systems, Lithium Bromide absorption refrigeration systems, Electrolux refrigerator. (Descriptive Treatment) . (4hrs)

Section – II

5. Psychrometry

Moist air as a working substance, Psychrometry properties of air, Use of psychrometric tables & charts, Processes, Combinations & calculations, ADP, Coil condition line, Sensible heat factor, Bypass factor, Air washer & its applications. (Numerical Treatment) (7 hrs)

6. Heating & Cooling Load Calculation:

Representation of actual air conditioning process by layouts & on Psychrometric charts, Load analysis RSHF, GSHF, Enumeration & brief explanation of the factors forming the load on refrigeration & air conditioning system (Numerical Treatment) (6hrs)

7. Comfort Conditions & Air Distribution System:

Thermal exchange between human body & environment, Factors affecting comfort, effective temperature comfort chart, Ventilation requirements.

Duct classification, duct material, duct construction, duct design, Methods for duct design, determination of duct size, losses in duct (Theoretical Treatment) (4hrs)

8. Introduction to Cryogenics:

Introduction, Limitation of VCRS For production of low temp., Cascade refrigeration, Linde system for liquefaction of air, production of low temperature by adiabatic demagnetization of paramagnetic salt. (Theoretical Treatment) (3hrs)

Term Work

Group I (Study, Demonstration & minimum four assignment on following topics)

01. Study of Refrigeration methods
02. Study of Refrigeration Equipments
03. Study of Refrigeration systems – domestic refrigerator, Split air conditioning, Ice plant, Deep freezer etc.
04. Study of food preservation, Methods of food freezing
05. Study of charging, leak testing of refrigeration systems
06. Study of non conventional refrigeration systems

Group II (Minimum three experiments on following list)

01. Trial on Refrigeration primer / bench
02. Trial on Air conditioning tutor
03. Trial on mini ice plant
04. Trial on Vapour Absorption system
05. Trial on Heat Pump

Group III

1. Visit to refrigeration plant or Central Air conditioning plant
2. Performance evaluation of any one trial of Group-II by using MATLAB/C Programming

Text Books:

01. 'Refrigeration & Air Conditioning' by C.P. Arora
02. 'Refrigeration & Air Conditioning' by Arora & Domkundwar
03. 'Refrigeration and Air-conditioning' by Khurmi R.S., Gupta

Reference Books:

01. 'Principle of Refrigeration' by Roy J Dossat
02. 'Air Conditioning Applications & design' by W.P. Jones
03. 'Refrigeration & Air Conditioning' by Stocker

4.2 Automobile Engineering

Teaching Scheme

Lecturers: 3 Hrs/ Week

Practical's: 2 Hrs/ Week

Examination Scheme

ISE-30 Marks

ESE-70 Marks

ICA- 25 Marks

Oral: 25 Marks

Objectives

1. Study basic principles of actual automobile systems
2. Study important systems in an automobile
3. Study recent and modern trends in automobile sector
4. To make students aware about the entrepreneurial opportunities in automobile engineering field.

Outcomes: Learner will be able to...

1. Demonstrate & explain various systems in an automobile
2. Describe importance and features of different elements like axle, differential, brakes, steering, suspension, wheel balancing etc.
3. Explain principle of operation, construction and applications of various sensors used in modern automobile

Section – I

1. Introduction to Automobiles:

04

Broad classification of Automobiles. Major Components and their functions. Types of vehicle layouts, Front engine rear wheel drive, Front engine front wheel drive, Rear engine rear wheel drive, All wheel drive, specifications of vehicles. Types of bodies, Body construction and materials, and safety devices.

2. Performance of Automobiles:

05

Resistance to vehicle motion, Air, Rolling and Gradient resistance, Acceleration, Grade ability and draw bar pull, Traction and Tractive effort, Distribution of weight, Power required for vehicle propulsion, Selection of gear ratio, Rear axle ratio. (Numerical)

3. Transmission System:

08

Requirements of transmission system, Automobile clutch- requirements, types & functions, Single plate, Multi-plate, Centrifugal, Electromagnetic & Fluid flywheel. Types of automotive gearboxes, Working of sliding mesh, Constant mesh and Synchronesh gearbox, Overdrive, Principle of operation of automatic transmission, Torque converter, Epicyclical gear trains, Propeller shaft, Universal and slip joint, Final drive and its types, Differential, Construction and types of rear axles, Introduction to wheels and tyres.

4. Automobile Electrical Systems:**03**

Automotive batteries, automotive lighting system. Starting system, charging system, Electric horn, Electric fuel Gauge- thermostatic & balancing coil type, Wiper & side indicator circuit, electric Speedo meter.

Section – II**5. Steering System:****06**

Function of steering, Steering system layout, Automotive steering mechanism- Ackerman and Davis, Types of steering gear boxes, Condition for true rolling, Steering geometry-Camber, Caster, King pin inclination, Included angle, Toe-in and Toe-out, Wheel alignment, Slip angle, Under steer & over steer, Types and working of power steering,. . (Numerical)

6. Braking System:**06**

Function of automotive brake system, Types of braking mechanism, internal expanding & Disc brake, Mechanical, Hydraulic & Air brake system, power brakes, Anti lock braking, Calculation of braking force required, stopping distance and dynamic weight transfer.(Numerical)

7. Suspension Systems:**05**

Suspension requirements, Sprung and Un sprung mass, Types of automotive suspension systems. Conventional and Independent, Shock absorber, Types of springs, Hotch- kiss and Torque tube drive, Reaction members-Radius rod, Stabilizer bar, Air suspension system.

8. Modern Trends:**03**

Engine electronic control modules, Introduction to Sensors and actuators used in automobile controls, Electronic Control Unit, traction control devices, fuel cells Hybrid vehicles-Electrical vehicle, solar vehicles.

Term Work

Minimum **six** experiments from Group A and **two** experiment from Group B are to be performed

Group A.

1. Study and demonstration of four wheeler chassis layout. Two-wheel & four wheel drive layouts.
2. Study and Demonstration of working of single plate automobile clutch.
3. Study and demonstration of synchromesh gearbox.
4. Study and demonstration of final drive and differential.
5. Study and demonstration of working Hydraulic braking system.
6. Study and demonstration of front wheel steering geometry and steering mechanism.
7. Study and demonstration of suspension system of a four-wheeler.
8. Study and demonstration of battery and electrical starting system
9. Study and demonstration of (a) Electric horn. (b) Electric fuel Gauge. (c) Flasher unit. (d) Wiper circuit

Group B.

1. Experiment on wheel balancing & front wheel alignment.
2. Visit to servicing station for study of vehicle maintenance, repairs and report.
3. A case study presentation and report covering recent trends in automobiles.

Books Recommended**Text books-**

1. Kripal Singh - Automobile Engineering – Standard publisher.
2. Automobile Mechanics -.N. K. Giri
3. Automobile Electrical Equipment -P. S. Kohali

Reference Books:

1. K. Newton and W. Seeds, T.K. Garrett, Motor Vehicle, Elsevier publications
 2. Hans Hermann Braess, Ulrich Seiffen, handbook of Automotive Engineering, SAE Publications
 3. William H. Crouse. Automotive Mechanics - Tata McGraw Hill Publishing House
 4. Joseph Heitner, Automotive Mechanics -C.B.S Publishers And Distributors
 5. SAE Manuals and Standard
 8. Narang G. B. S - Automobile Engineering - S. Chand and Company Ltd.
 9. Singh Kripal - Automobile Engineering –Standard publisher
-

6. Industrial Training

Teaching Scheme:

Practical: 1 Hour / week

Examination Scheme:

ICA: 50 Marks

Oral Exam: 25 Marks

Course Objectives:

1. To make the students aware of Industrial culture & Organizational setup.
2. To create awareness about technical report writing among the student.

Procedure for Assessment of Industrial Training done by student

- Every student should prepare a report of training done (minimum 15 days) in a prescribed format before end of Part I Semester.
- Format of the report will be decided by the concerned guide.
- The report shall be comprehensive and presented in duplicate, typed on a standard A4 size sheet and bound.
- Every student should give presentation to project guide on industrial Training Report.
- The University oral examination will be based on the term work.
- Guidelines for conducting vocational training practical's

7. Project Work - I

Teaching Scheme

Practical: 4 Hrs/ Week

Examination Scheme

ICA: 50 Marks

Course Objectives:

1. Application of the knowledge gained to practical situations.
2. Develop the technical problem solving ability.

Guidelines for Project content & Mark Distribution:

	Marks
a. Work diary and weekly reporting	20
b. Synopsis	10
c. Progress report submission and presentation	20

Project Term Work:

The term work under project submitted by students shall include:

a. Work diary and weekly reporting:

Work Diary maintained by group and countersigned by the guide weekly. The contents of work diary shall reflect the efforts taken by project group for

1. Searching suitable project work
2. Brief report preferably on journals/ research or conference papers/ books or literature surveyed to select and bring out the project.
3. Brief report of feasibility studies carried to implement the conclusion.
4. Rough Sketches/ Design Calculations, etc.

b. Synopsis:

The group should submit the synopsis (of 4-5 pages) in following form.

2. Title of Project
3. Names of Students
4. Name of Guide
5. Proposed work (Must indicate the scope of the work & weekly plan up to March end)
6. Approximate Expenditure (if any)

The synopsis shall be signed by the each student in the group, approved by the guide and endorsed by the Head of the Department.

c. Progress report submission and presentation:

The group has to give a power point presentation in front of the faculty of department on the progress completed till end of first semester along with the progress report.

4.3 Plastic Engineering

Teaching Scheme:

Lectures: 3 Lectures / weeks

Tutorial: 2 Hours / week

Examination Scheme:

ISE-30 Marks

ESE-70 Marks

ICA- 25 Marks

Oral Exam: 25 Marks

OBJECTIVES

1. To understand the mechanism of polymerization, techniques of polymerization and the significance of different molecular weight averages.
2. To provide the depth knowledge about different kinds of plastic materials based on their structure and properties.
3. To make the students familiar about properties and processing of plastics and use it for different applications.

OUTCOMES

At the end of the course, the student should be able to

1. Select the plastic materials for particular end user application
2. Predict the structure and properties of different kind of plastic material
3. Know the processing of different plastic material based on the end user requirement.

Section I

Unit –I Introduction to Plastics

4

Definition and Classification of Plastic Materials, Properties of plastics, applications, Testing methods for plastics, additives in plastics, Monomers & Polymers, Polymerization - Types of Polymerization.

Unit –II Processing of Plastics

6

Injection moulding, Extrusion moulding, sheet forming processes calendaring, Blow moulding, Processing of thermosetting plastics, compression moulding, Transfer moulding, rotational moulding.

UNIT III Welding of Plastics

4

Hot gas welding, hot tool welding, High frequency induction welding, nuclear welding, Intra-red welding.

UNIT IV Design of Plastic Parts

6

Tolerances of molded plastics parts, allowances in plastics, Design corners, undercuts, curing time, ribs, minimum wall thickness, design of inserts, cores mould materials,

Section II

UNIT V Design of compression and transfer molds

6

- a) Design and main parts of compression mould, standard insert mould body, design of loading chamber, design of punch, ejectors, stripper guided pin.
- b) Technology of transfer mould, types, main parts, automation in transfer mould.

Unit VI Injection Mould Design

6

Injection mould design, Single, multi cavity, semi-automatic and automatic moulds. Types of injection mould, detailed structure and working. Feed system, Temperature control system, Ejection System, application.

UNIT VII Cooling of plastic injection mould

5

Determining the heat quantity dissipated with cooling, heat dissipation with natural cooling, mean temperature, thermal resistance of mold body, summary of dimension and construction of correct cooling system.

UNIT VIII Introduction of advanced Plastics

3

Introduction to composite plastics, Introduction of polymer degradation and biodegradable plastics, advanced application like Agriculture, Packaging, Building, Transport, Electrical, Electronics, Medical and Furniture

Term Work-

1. Injection mould design for simple component 2 Turns
2. Design of Blow Mould 2 Turns
3. Design of Compression mould 2 Turns
4. Two Case studies for mould manufacturing 2 Turns
5. Visit to Plastic industry (Thermo sets & Thermo Plasts)

Books -

1. J.A.Brydson, "Plastics Materials", Butter worth Heinemann Oxford,1999
2. Schwartz & good man "Plastics materials and processing"
3. Irwin rubin "Hand book of Plastic Materials and technology"
7. Fred W. Billmeyer, JR., "Text Book of Polymer Science", John Wiley & Sons,Singapore,1994.

5. Project Work – II

Teaching Scheme:

Practical's: 8 Hrs/ Week

Examination Scheme:

ICA- 100 Marks

Oral Exam: 100 Marks

Guidelines for Project contents & mark distribution:

a) Work diary and weekly reporting	20
b) Project Report	40
c) Presentation	40

Project Report:

Project report should be of 25 to 50 pages (More pages can be used if needed). For standardization of the project reports the following format should be strictly followed.

1. Page size: Trimmed A4
2. Top Margin: 1.00 Inches
3. Bottom Margin: 1.32 Inches
4. Left Margin: 1.5 Inches
5. Right Margin: 1.0 Inches
6. Para Text: Times New Roman 12 point font
7. Line Spacing: 1.5 Lines
8. Page Numbers: Right aligned at footer, font 12 point Times New Roman
9. Headings: New Times Roman, 14 point, Boldface
10. Certificate:

All students should attach standard format of Certificate as described by the Department. Certificate should be awarded to batch and not individual student Certificate should have signatures of Guide, Principal, and External Examiner. Entire Report has to be segmented chapter wise as per the requirement.

11. Index of Report:
 - i) Title Sheet
 - ii) Certificate from Guide/ College
 - iii) Acknowledgement
 - iv) Abstract (Brief content of the work)
 - v) List of Figures
 - vi) List of Table

1. Introduction (History, Importance of Project Area, Problem identification, Objective of the Project)
2. Literature Review
3. Design/ Experimentation/ Fabrication/ Production/ Actual work carried out for the same.
4. Observation/ Analysis/ Findings/Results
5. Discussion on Results and Conclusion

References:

12. References or Bibliography: References should have the following format

For Books: “Title of Book”; Authors; Publisher; Edition;

For Papers: Authors, Year of Publication, “Title of Paper”; Conference Details/
General Details; Page No.

b) Presentation:

The group has to prepare a power point presentation on project report, project and present it in front of the faculty of department along with the demonstration of the project. One copy of the report should be submitted to Institute/ Department, One copy to Guide and one copy should remain with each student of the project group.

(Sample Format for Project Work Diary):

Project Progress Sheet

SOLAPUR UNIVERSITY, SOLAPUR
B.E. (COMPUTER SCIENCE & ENGINEERING)
SEMESTER - II

VOCATIONAL TRAINING

Examination Scheme
Termwork: 25 marks

The student should attend vocational training arranged at Industry or Institute and should complete a mini project on the technology on which training was given. A report regarding satisfactory completion of the training should be submitted to the college by competent authority from Industry / Institute. The evaluation of Term Work will be carried out by a panel of Examiners decided by the institute.

SOLAPUR UNIVERSITY, SOLAPUR
B. E. (COMPUTER SCIENCE & ENGINEERING)
SEMESTER - I

LAB I : PROJECT PHASE I

Teaching Scheme

Practical : 4 Hours /Week

Examination Scheme

Termwork : 50 Marks

POE : 50 Marks

COURSE OBJECTIVES:

- 1) Formulate a realistic problem statement using SDLC.
- 2) Follow an appropriate designing technique for further development of a project.
- 3) Get acquainted to work in a team.
- 4) Develop soft skills including presentation, writing & convincing.

COURSE OUTCOMES:

- 1) Define a realistic problem statement.
- 2) Select & apply an appropriate technique to create a design.
- 3) Work in teams with good coordination.
- 4) Present their work through oral communication & writing skills.

Strategy:

- 1) A project group shall be about 4 students.
- 2) Students have to study existing system, problems in existing system, proposed system, its definition, scope, design, introduction to programming tools, hardware and software platforms, planning, activity charts, planning for testing, test case design etc.
- 3) Project leader should maintain the progress register in which each member weekly contribution should be written and the guide will countersign the same.
- 4) A project design report will be submitted as a term work document at the end of semester.

SOLAPUR UNIVERSITY, SOLAPUR
B.E. (COMPUTER SCIENCE & ENGINEERING)
SEMESTER - II

LAB II – PROJECT PHASE II

Teaching Scheme

Practical : 6 Hours/Week

Examination Scheme

Termwork: 100 marks

POE : 100 marks

COURSE OBJECTIVES:

- 1) Formulate a realistic problem statement using SDLC.
- 2) Follow an appropriate designing technique for further development of a project.
- 3) Get acquainted to work in a team.
- 4) Develop soft skills including presentation, writing & convincing.

COURSE OUTCOMES:

- 1) Define a realistic problem statement.
- 2) Select & apply an appropriate technique to create a design.
- 3) Work in teams with good coordination.
- 4) Present their work through oral communication & writing skills.

-
- 1) Project – II should contain the work like Design review, Implementation details, coding, Technologies used, Testing, Task distribution. Project leader should maintain the progress register in which each members weekly contribution should be written and the guide will countersign the same.
 - 2) A project report will be submitted as a term work document at the end of semester. Report must include References, Appendix, User manual / Technical reference manual, CD containing Project documentation, implementation, code, required utilities, Software and Manuals.
 - 3) Every student must prepare well formatted, printed and hard bound report.

7	Mini project	-	-	2	-	25	25	-	50
8	Self Learning (HSS /Technical)				50				50
	Total	18	2	10	550	175	25	100	850

Subjects for Self Learning for Humanities and Social Sciences (HSS) 1. Economics 2. Psychology 3. Philosophy 4. Sociology 5. Humanities	Subjects for Self Learning for Technical Subjects 1. Computer Modeling and Simulation 2. Software licenses and practices 3. Network set up & management tools
---	---

Note:

- The term-work will be assessed based on continuous internal evaluation including class tests, assignments, performance in laboratories, Interaction in class, quizzes and group discussions as applicable.
- The batch size for practical/tutorials be of 15 students. On forming the batches, if the strength of remaining students exceeds 7 students, then a new batch may be formed.
- Mini Project shall consist of developing small software based on tools & technologies learnt in SE and TE.
- Project group for T.E.(CSE) Part II Mini Project shall be of 4 / 5 students
- Vocational Training (evaluated at B.E. Part-I) of minimum 15 days shall be completed in any vacation after S.E. Part-II but before B.E. Part-I & the report shall be submitted and evaluated in B.E. Part-I
- Student shall select one Self Learning Module from HSS at T.E. Part I and oneself learning module either from HSS or from technical at T.E. Part II
- Curriculum for Humanities and Social Sciences Self Learning Modules is common for all under graduate programmes under faculty of Engineering and Technology.

SOLAPUR UNIVERSITY, SOLAPUR

T.E. (Computer Science and Engineering)

Semester - II

7. Mini Project

Teaching Scheme

Practical – 2 Hrs/week

Examination Scheme

Termwork: 25 Marks

Oral Exam: 25 Marks

COURSE OBJECTIVES:

1. To undertake investigation of complex problems.
2. To motivate students to undertake design of a product, which is sustainable and meaningful to society
3. To enable students to acquire and develop professional skills.
4. To make students learn to work in team.
5. To encourage independent critical thinking, creativity and discipline.
6. To use modern tools and simulation packages
7. To prepare students to implement their acquired engineering knowledge for society.

COURSE OUTCOMES:

At the end of the course, student will be able to

1. Identify and define the problem.
2. Develop a sustainable product or offer a effective solution to industrial problem.
3. Present proposal within budgetary and time constraints with effective communication and writing skills.
4. Develop leadership qualities.
5. Criticize and refine own solution or product.
6. Apply modern tools and simulation packages to develop product.
7. Develop a strong sense of social responsibility and accountability.

Note:

1. There should be a group of preferably 4 students.
2. Students should be given projects in hardware, software, embedded or any contemporary topic in CSE and/or IT
3. One guide should be allocated per batch.

Mini Project ideas (but not limited to):

1. Online Examination module (Multiple choice questions)
2. Attendance recording and analysis software module
3. Examination Result analysis software module
4. Hardware exhibitors such as display board exhibiting all types of mouse / keyboards, HDDs, Monitors etc.), Internal architecture and working
5. Departments / College website
6. Library Management System
7. Hotel Management System
8. Time table generation
9. CD Library management system
10. Admission procedure automation

11. Online passport registration automation
12. Student Feedback system automation
13. Ice Cream parlor management system
14. Pizza hut – account management system
15. Multi player strategy game – Project ideas on Visual Basic, Java, Database
16. A speech response application using some hardware interface using the Microsoft SAPI SDK
17. LAN administrator tool (socket programming comes easy in VB) which will monitor application on a LAN and provide functions.
18. Voice mail systems
19. Computer telephony integration
20. Student Informa
21. Traffic Control s
22. Airline reservatic
23. Simulation for B
24. Mini Calculator i
25. Moving ball gam
26. Tic-tac-toe game
27. Design a persona

T.E. (Electronics and Telecommunication Engineering)

Semester-II

6. MINI PROJECT (HARDWARE)

Teaching Scheme:

Practical : 2 Hr/Week

Examination Scheme:

Term-Work: 25 Marks

Course Objectives

- 1) To understand PCB designing processes and techniques.
- 2) To make students familiar with PCB artwork and fabrication.
- 3) To design, implement, analyze, and test Hardware/Software mini project.

Course Outcome

On completion of this course, students will be able to :

- 1) Understand and design PCB technique.
- 2) Understand and design PCB artwork and fabrication techniques.
- 3) Design, implement, analyze, and test Hardware mini project.

1. Maximum Group Size: Minimum 2 and maximum 3 students can form a group for the mini project.

2. Project Type: The selected mini project must be based on development of a prototype electronic system/product mandatorily having a hardware component with supporting software.

3. Execution steps for Mini Projects:

- (i) Complete Paper work Design using datasheets specifying: Selection criteria of the components to be used. Specifications of system i/p and desired o/p. Module based hardware design.
Test points at various stages in various modules
- (ii) The circuit should be simulated using any of the standard simulation software available (either complete circuit to be simulated, if possible or an appropriate part of the circuit can be simulated.)
- (iii) Algorithm and the flow chart of the software part must be defined.
- (iv) Result verification for hardware and testing the algorithms.
- (v) Comparison with the paper design to identify the discrepancies, if any. Justification of the same must be given.
- (vi) Verified circuit should be assembled and tested on breadboard or general purpose board.
- (vii) Simulation results and/or the snapshots indicating the current and voltage readings or detailing

- the test point results at various stages must be preserved and included in the project report.
- (viii) Art work / layout of the circuit using standard layout tools.
 - (ix) Assembling and testing of circuit on final PCB.
 - (x) Design and fabrication of suitable enclosure and outside fittings such as switches, Buttons, knobs, meters, indicators, displays etc.
 - (xi) Final testing of the circuit using the earlier defined test points.
 - (xii) Preparing Bill of components and materials.
 - (xiii) Drawing entire circuit diagram (Component level), outlining various blocks indicating test points, inputs and outputs at various stages on A3 graph sheet

4. Guidelines for the Seminar:

Seminar is based on the Mini Project topic.

The seminar shall consist of the Literature Survey, Market survey, Basic project work and Applications of Mini project.

Seminar Assessment shall be based on Innovative Idea, Presentation skill, depth of understanding, Applications, Future Scope and Individual Contribution.

Maximum three students can deliver a seminar on one topic.(Three students per group) Each group shall be given time of 20 mins for presentation and 5 mins for question answer session.

A certified copy of seminar/ project report shall be required to be presented to external examiner at the time of final examination.

Solapur University, Solapur
S.E. (Civil Engineering) Semester-I
CV216 - ENGINEERING GEOLOGY

Teaching Scheme

Lectures – 2 Hrs/Week, 2 Credits

Practical – 2 Hrs/Week, 1 Credit

Examination Scheme

ESE- 70 Marks

ISE- 30 Marks

ICA- 25 Marks

POE- 25 Marks

Course Objectives

- 1) To introduce the scope, relation and application of geology in civil engineering.
- 2) To acquaint students with general geology, mineralogy, petrology, structural geology and engineering geology.
- 3) To impart knowledge of rocks, minerals and building stones.
- 4) To elaborate Geological aspects of earthquakes and landslides.
- 5) To impart knowledge of geological site investigation for dams, reservoir, bridges and various other Civil engineering structures.

Course Outcomes:

At the end of this course:

- 1) Students will be able to identify different type of rocks and minerals and building stones.
- 2) Students will be able to draw geological maps.
- 3) The students will be able judge the suitability of sites based on geological aspects of site
- 4) This course will be able to carry out preliminary geological investigation of site related to civil engineering projects.

SECTION – I

Unit 1. GENERAL GEOLOGY

(04 Hrs.)

Introduction, Definition, Scope and Subdivision of the Geology subject, interrelation between Geology and civil Engineering.

Earthquake: Definition and terminology related with earthquake, causes seismic waves, Seismograph, Effects, reservoir induced seismicity.

Landslides: Types, causes and preventions of landslides Interior of earth.

Volcano: Products of volcano, central and fissure type of volcanoes, Causes, Distribution of volcanoes.

Mountains: Types, process of formation with Indian Examples.

- b) Secondary Rocks: Laterite, Bauxite, Conglomerate, Breccia, Sandstone, ferruginous Sandstone, Grit, Arkose Shales, Mudstone, chemical and organic Limestone, coal.
 - c) Metamorphic Rocks: Slate, Phyllite, marble, mica Schist, Biotite schist, muscovite Schist, Chlorite Schist, Talc Schist, Kyanite Schist, Granite Gneiss, Augen Gneiss.
 - 4) Study of different types of geological maps, Section and their engineering significance. (at least 10)
 - 5) Study of structural Geological models. (at least 5)
 - 6) Study tour to the place worth visiting from Engineering Geological point of view.
 - 7) Study of core samples, Core Logging.
 - 8) Identification of Subsurface rock with the help of Resistivity Instrument.
 - 9) Study of various building stones with respect to engineering properties
-
- 1) A journal containing complete record of above practical work shall be examined as a Internal Continuous Assessment. Practical Examination shall be based on practical course.
 - 2) Case study of any engineering structure with respect to geological investigation

TEXT BOOKS

1. Principles of Petrology – By G.W. Tyrrell
2. Textbook of Geology by P. K. Mukherjee
3. A text book of Engineering Geology –By R. V. Gupte- Pune Vidyarthi Griha Prakashan Pune.
4. Engineering Geology for civil Engineering – By Dr. D.V.Reddy.

T.E. (CIVIL ENGINEERING) PART- I ENVIRONMENTAL ENGINEERING –I

Teaching Scheme

Lectures: 3 hours per week
Practical: 2 hours per week

Examination Scheme

Theory papers: 100 Marks
Term Work: 25 Marks

Course Objectives

1. To acquaint the students with drinking water quality standards and forecast water demands.
2. Study of various units of water treatment plants, treatment procedures and sequencing of water treatment units for various sources of water.
3. To prepare the students to carry out design of water distribution systems and appurtenances using appropriate methods.
4. To acquaint the students with various plumbing systems, and their operation and maintenance.

Course Outcomes

Upon successful completion of course the student will be able to:

1. Plan and design water supply systems for a rural/urban area based on population forecasts.
2. Design various water treatment units and plan their operations on the basis of raw water quality and water demand.
3. Apply knowledge of advanced water treatment processes for individual water purification units.
4. Design and supervise building plumbing systems and their maintenance.

- 11 Most Probable Number
- 12 Optimum dose of alum by jar test
- 13 Fluorides
- 14 Nitrogen
- 15 Irons and Manganese

(B) Design /Analysis Problems on each water treatment unit and distribution system.

(C) Visit to water treatment plant

Term work submission shall consist of journals containing

1. Above mentioned Experiments
2. Visit report describing the water treatment units of the plants visited.
3. Design problems mentioned in B

1.Environmental Engineering by Peavey, H.S.Rowe, D.R. and Tchobanoglous McGraw Hill Book Company.

2.Water Supply and Pollution Control by Viessman W.and Hammer M.J. Harper Collins College Publishers.

3.Water and Waste Water Technology by Hammer M.J. Prentice-Hall of India Private Ltd.

4.Water and Wastewater Technology by G.S. Birdie and J.S. Birdie

5.Water Supply by Duggal K.N. ,S. Chand and Company.

6.Water Supply by Garg S.K., Khanna Publishers.

7.Water Supply and Waste water Disposal by Fair and Gayes, John Wiley Publication.

8.Water Supply Engineering by B.C.Punmia,Ashok Jain,Arun Jain, Laxmi Publications

Note:

- (1) Students shall undergo a field training of 15 days in the winter vacation after T.E. Part I and submit the field training report, which shall be assessed by faculty associated with Engineering Management- II in T.E. Part II.
- (2) Students shall undergo a field training of 15 days in the summer vacation after T.E. Part II. The training report shall be assessed in B.E. Part -I by the concerned project guides.
- (3) Term work assessment: Term Work assessment shall be a continuous process based on the performance of the student in assignments, class tests, quizzes, attendance and interaction during theory and lab sessions, syllabus, report presentation etc., as applicable.
- (4) Syllabus of Self learning (H.S.S.) is common for all Under Graduate Programs under Faculty of Engineering and Technology.
- (5) The batch size for the practical/tutorial is of 15 students. On forming the batches, if the number of remaining students exceeds 7 students, then a new batch be formed.

A handwritten signature in blue ink, consisting of a large circular loop followed by several vertical and horizontal strokes, ending in a long horizontal line extending to the right.

T.E. (CIVIL ENGINEERING) PART II ENVIRONMENTAL ENGINEERING –II

Teaching Scheme

Lectures: 3 Hours per week
Practical: 2 Hours per week

Examination Scheme

Theory papers: 100 Marks
Term Work: 25 Marks
Oral Examination: 25 Marks

Course Objectives

1. To acquaint the students with the characterization of municipal waste, as well as sewage collection & conveyance systems.
2. Study of Primary and Secondary treatment methods of sewage, and concept of recycling the wastewater.
3. Familiarize the students with stream pollution due to waste disposal and suitable centralized/decentralized wastewater Treatment system
4. Learning solid waste and hazardous waste management systems for urban areas.
5. Understanding various sources of air pollution, its measurement and control.

Course Outcomes

Upon successful completion of course the student should be able to:

1. Plan the layout of sewage collection system, matching the topography of the region and characterisation of sewage.
2. Decide sequence and design of wastewater treatment units to meet the sewage treatment standards.
3. Design the wastewater treatment plant using Trickling filter, anaerobic treatment and low cost treatment methods
4. Adopt appropriate methods of Solid waste Disposal and Management of hazardous waste.
5. Measure air pollution and adopt control measures to control of industrial air pollution.

3. Biochemical Oxygen Demand
4. Chemical Oxygen Demand
5. Chlorides
6. Oil & Grease
7. Sulphate Content
8. Total Nitrogen
9. Demonstration of High Volume Sampler
10. Demonstration of Auto Exhaust Analyzer.

(B) Design of sewerage system & Treatment system for a small urban area.

(C) Visit to sewage treatment plant

Term work submission shall consist of the following –

1. Journal containing experiments carried out in part A of the term work and visit Report on C
2. Detail design and appropriate drawings required for part B of the term work.

TEXT BOOKS

1. Environmental Engineering by Peavey- H. S. Rowe, D.R. and Thobanoglous, [McGraw – Hill Book Company]
2. Water supply and pollution control - Viessman W. and Hammer M.J. [Harper Collins College Publishers.]

Notes:

- (1) Project group be of @ 7 students.
- (2) Elective subject can be offered from the following list, if minimum 15 students opt for that subject.
- (3) Term work assessment: Term Work assessment shall be a continuous process based on the performance of the student in assignments, class tests, quizzes, attendance and interaction during theory and lab sessions, journal writing, report presentation etc., as applicable

w. e. f. Academic Year 2017-18

B.E. Civil – Part I

4. WATER RESOURCES ENGINEERING – II

Teaching Scheme:

Lectures – 3 Hrs/Week, 3 Credits

Practical – 2 Hr/Week, 1 Credit

Examination Scheme

ISE – 30 Marks

ESE –70 Marks

ICA – 25 Marks

ESE (OE) -25 Marks

Course Objectives:

- 1) To study the different aspects of design of hydraulic structures
- 2) To design different types of dams
- 3) To provide knowledge on various hydraulic structures such as energy dissipaters, head and, Cross regulators canal falls and structures involved in cross drainage works
- 4) To understand the analysis of seepage and hydraulic jump

Course Outcomes:

After studying this subject the students will be able to

- 1) Plan and design the reservoirs depending upon the water resources potential.
- 2) Analyze and design Gravity dams and Earth dams (Simple Designs).
- 3) Demonstrate the design principles of Arch dams.
- 4) Solve seepage problems for Weirs on Permeable Foundations
- 5) Demonstrate the knowledge of water power engineering and river training.

SECTION – I

Unit 1:

(5)

- a) Planning of Reservoirs: Storage calculations, Control levels, silting of reservoirs, reservoir sedimentation surveys, reservoir losses. Use of remote sensing for reservoir sedimentation surveys.
- b) Dams – Necessity, types of dams, selection of site for dams, selection of type of dam, Introduction to dam instrumentation

w. e. f. Academic Year 2017-18

Unit 7:**(5)**

- a) River and River Training Works: Types of rivers, Meandering phenomenon, Types of river training works, river navigation.
- b) Water Logging and Drainage: Causes, effects, preventive and curative measures, alkaline soils, soil efflorescence, drainage arrangements.

Unit 8:**(5)**

Elements of Hydropower Engineering: Power crisis and competing uses of water, need of harnessing solar energy. Types of water power plants, small hydropower plants, layout and components of each type, Intakes, Conveyance system, Surge tanks, Power house types, components and layout, tail race. Managing power demand using various sources of power.

TERM WORK

A) Minimum seven assignments from the following:

- 1) Determination of height of dam: Reservoir capacity calculations based on demand and Supply, fixing control levels of dam.
- 2) Design of gravity dam: Elementary and practical profile with stability calculations
- 3) Earth dam
 - a) Design- Determination of section – slip circle calculations.
 - b) Filters and Drainage arrangements.
- 4) Spillway: Geometrical section, Design of spillway; Energy dissipation arrangements and gates.
- 5) Arch dam layout of constant angle and constant radius
- 6) Drawing sheet: Outlets through earth dam. Masonry dam, layout.
- 7) Drawing sheet: Typical plan and section of Kolhapur type barrage.
- 8) A typical layout of Hydropower plant and its functioning. Calculating reservoir capacity for hydropower plant
- 9) Design of any one Canal Structure / Cross Drainage Works

B) Report based on Field visits to Irrigation and Water Power Engineering Projects

ORAL EXAMINATION

Oral Examination will be based on the TERM WORK.

w. e. f. Academic Year 2017-18

B.E. (Civil) Part-I

7. PROJECT WORK

Teaching Scheme:

Practical – 2 Hr/Week, 1 Credit

Examination Scheme:

ICA – 25 Marks

Objectives:

- 1) To carry out a thematic design project in one of the specializations of civil engineering
- 2) To carry out a project that will make the students aware of the different facets of civil engineering.

The topic for the Project Work may be from any Civil Engineering and inter-disciplinary area related to Civil Engineering as mentioned in content at B.E. (Civil) Part-I. Practical work at B.E. (Civil) part-I will comprise of literature survey / problem formulation / preparation of experimental setup as the case may be of the identified problem.

w. e. f. Academic Year 2017-18

Credit - 1

ICA – 25 Marks

The students are required to undergo training in any of the areas of Civil Engineering for 30 working days beyond the academic schedule between the completion of T.E. (Civil) Part-I and B.E. (Civil) Part-I term end.

The training may be related to any of the Civil Engineering areas or inter-disciplinary areas such as:

- 1) Structural Engineering
- 2) Environmental Engineering
- 3) Geotechnical Engineering
- 4) Transportation Engineering
- 5) Infrastructural Engineering
- 6) Water Resources Engineering
- 7) Town & Country Planning
- 8) Construction Engineering
- 9) Surveying & Remote Sensing Techniques
- 10) Project Management
- 11) Legal Aspects in Civil Engineering
- 12) Earthquake Engineering
- 13) Disaster Management

Student shall submit a report of the field training undergone. The students should obtain a certificate of completion of training from the concerned organization and submit it to the department office. Assessment of the training report will be done by the 'Project Guide' to whom the concerned student is allotted.

Mini Project is to be completed in the vacation after Sem-II Examination.

- **Lab Practice:** Students are expected to learn the contemporary tools/software used in industries. It is desirable to use such software for their dissertation purpose. They should learn these with self learning approach. They are supposed to complete 5 assignments based on these tools/ software learnt and report progress to concerned guide weekly.
- **Dissertation Phase I Synopsis submission Seminar (ISE):** This presentation is to be evaluated by the panel of three PG teachers headed by guide at college level.

Course: Dissertation Phase I- Synopsis Submission Seminar

Teaching Scheme-Not Applicable

Examination Scheme

Practical: 4 hours a week

ISE: 25 Marks

ICA : 75 Marks

The synopsis shall include the problem definition, literature survey, and approaches for handling the problem, finalizing the methodology for the dissertation work and design calculations / experimental design etc., resources used, references for the literature survey, Cost estimation and sponsorship letter if any.

Students have to present the seminar based on this synopsis in front of a redressal committee of 3 persons.

The Principal shall appoint this redressal committee comprising of the Guide and two experts to review and approve the synopses before submitting them to the University for approval. This committee shall evaluate work (ISE) and submit the one page report of the suggestions/modifications in the synopsis. The candidates shall submit the synopsis to the University authorities for approval in before the due date.

The reports to be submitted to the university shall be in 8 copies. (1 Copy: Candidate, 1 Copy: Guide, 6 Copies: University)

Preparation of Dissertation Report: The dissertation to be submitted by the student on topic already approved by university authorities on the basis of synopsis shall be according to the following guide lines.

Format of dissertation report:

The dissertation work report shall be typed on A4 size bond paper. The total No. of minimum pages shall not be less than 60. Figures, graphs, annexure etc. should be added as per the requirement.

The report should be written in the format as given below-

1. Title sheet
2. Certificate
3. Acknowledgement
4. List of figures, Photographs/Graphs/Tables
5. Abbreviations.
6. Abstract
7. Contents.
8. Text with usual scheme of chapters.
9. Discussion of the results and conclusions
10. Bibliography (the source of illustrative matter be acknowledged clearly at appropriate place as per IEEE/ASME/Elsevier Format).

Annexure: May contain photographs, paper presented in the conference/journals on the dissertation topic

The reports to be submitted to the university shall be hard bound (6 copies).

M.E. (CIVIL-STRUCTURES)

Semester – III

Choice Based Credit System (CBCS)

14. Dissertation Phase- I

Synopsis Submission Seminar

Teaching scheme:

Contact Hours: 3 hour per week per student

Credits: 3

Assessment scheme:

ISE: 75 marks

.....

The student is expected to carry out intensive literature survey for a period of about two months in the field of interest and to select a topic for his/her dissertation in consultation with the faculty advisor assigned. The student shall then submit a report and deliver a seminar on the problem chosen by him/her to the panel of three departmental PG recognized faculty members. It shall be expected that a student justifies the gravity and also the relevance of the problem through his/her seminar. This shall be for the approval of synopsis.

The assessment of Synopsis Submission Seminar shall be done by aforesaid panel of three departmental PG recognized faculty members.

M.E. (CIVIL- STRUCTURES)
Choice Based Credit System (CBCS)
Semester – III

15. Dissertation Phase II

Term Work

Credits: 3

Assessment scheme:

ISE: 100marks

.....

Student shall submit a report to the faculty advisor, on the basis of work carried out in accordance with instructions given by faculty advisor, throughout the semester. Dissertation Phase II evaluation consists of term-work evaluation (ISE) based on the efforts put in by the student to carry out his/her work & the results obtained thereof.

The faculty advisor shall complete the assessment of the report and accordingly allocate the marks to the student out of maximum 100 marks.

Solapur University, Solapur
M.E. (CIVIL- STRUCTURES)
Choice Based Credit System (CBCS)
Semester – III

16. Dissertation Phase II

Progress Seminar Presentation

Credits: 6

Assessment scheme: ESE: 200marks

.....

Progress seminar shall be delivered capturing details of the work done by the student for dissertation. Student shall deliver seminar using modern presentation tools. A hard copy of report shall be submitted to the faculty advisor before delivering the seminar. A PDF copy of the report must be submitted to the faculty advisor along with other details if any.

End Semester Evaluation (ESE) shall consist of presentation of progress seminar on the report submitted by the student, followed by demonstration before a panel three departmental PG recognized faculty members.

M.E. (CIVIL- STRUCTURES)
Semester – IV
Choice Based Credit System (CBCS)

17. Dissertation Phase III

Term Work

Progress seminar Presentation and Report

Teaching scheme:

Contact Hours: 5 hour per week per student

Credits: 4

Assessment scheme:

ISE: 100marks

.....

For all activities related to Phase III, student must interact regularly every week with the faculty advisor. The student who has cleared his/her Phase II evaluation, shall submit a report and present the status of work carried out on the dissertation after 8-10 weeks of Phase II ESE to three departmental PG recognized faculty members.

Progress seminar shall be delivered capturing details of the work done by student for dissertation. Student shall deliver seminar using modern presentation tools. A hard copy of report shall be submitted to the faculty advisor before delivering the seminar. A PDF copy of the report must be submitted to the faculty advisor along with other details if any.

The evaluation will be done by the aforesaid panel of three departmental PG recognized faculty members based on the requirements of completion of dissertation work for the dissertation Phase- III.

M.E. (CIVIL- STRUCTURES)

Semester – IV

Choice Based Credit System (CBCS)

18. Dissertation Phase-IV

Term Work

Credits: 6

Assessment scheme:

ISE: 200 marks

.....

After completing the dissertation work to the satisfaction of faculty advisor, the student shall submit the dissertation report to the University in the prescribed format. The final approved dissertation shall be submitted in black bound hard copy along with soft copy on CD/DVD.

The evaluation of dissertation is to be carried out by the faculty advisor as ISE for 200 marks. This evaluation shall be on the basis of the requirements of completion of dissertation work. The faculty advisor shall submit mark list of term work marks, along with the submission of dissertation to university as mentioned in assessment scheme.

M.E. (CIVIL- STRUCTURES)

Semester – IV

Choice Based Credit System (CBCS)

19. Dissertation Phase IV

Final Submission of the dissertation and Viva-Voce

Credits: 6

Assessment scheme:

ESE: 200 marks

.....

Open defense of the student on his/her dissertation shall be arranged by the university. This defense shall be in front of the panel of examiners as appointed by university authority. The evaluation will be done by panel of examiners as appointed by university authority.
